To turn on your computer
Para encender la computadora

Before sharing your computer for file sharing, its not a bad idea to run a malware scan. While you're at it, you can also check for updates to your operating system. An updated operating system can help you better protect your system. Again, remember, always use common sense. For example, a person at your computer should not be able to access your files or your system. If you're not sure, it's best to ask for help.
