Virus Hunters Documentary:

Cancer Virus Hunters Gregory J. Morgan, 2022-08-02 Traces the history of the study of tumor viruses and its role in driving breakthroughs in cancer research Worldwide approximately one fifth of human cancers are caused by tumor viruses with hepatitis B virus and HPV being the leading culprits While the explosive growth in molecular biology in the late twentieth century is well known the role that the study of tumor viruses has played in driving many of the greatest breakthroughs is not Without the insights gained by studying tumor viruses many significant theoretical advancements over the last four decades in cellular and molecular biology would not have been made More practically the study of tumor viruses has saved thousands if not millions of lives In *Cancer Virus Hunters* Gregory J Morgan traces the high points in the development of tumor virology from Peyton Rous's pioneering work on chicken tumors in 1909 to the successful development of an HPV vaccine for cervical cancer in 2006 Morgan offers a novel approach to understanding the interconnectedness of a long series of biomedical breakthroughs including those that led to seven Nobel prizes Among other advances Morgan describes and contextualizes the science that prompted the discoveries of reverse transcriptase RNA splicing the tumor suppressor p53 the vaccine for hepatitis B and the HIV test He also explores how cancer virus hunters have demonstrated the virtue of beginning with a simple system even when investigating a complex disease like cancer Based on extensive archival research and over fifty interviews with experts *Cancer Virus Hunters* is a tour de force summarizing a century of research to show how discoveries made with tumor viruses came to dominate the contemporary understanding of cancer By showcasing the scientists themselves the book makes for an unusually accessible journey through the history of science It will be of interest to biomedical professionals especially in oncology hepatology and infectious disease in addition to historians of science and anyone interested in cancer research

Level 4: Virus Hunters of the CDC Joseph McCormick, M.D., Susan Fischer-Hoch, M.D., 2020-04-01 McCormick has been face to face with Ebola in Africa He worked for days inside a mud hut that was smeared with Ebola blood on his knees among people who were crashing and bleeding out Richard Preston *The Hot Zone* Now with a new foreword by the authors about the novel Coronavirus pandemic Sublimely equipped to survive to propagate to conquer the virus is neither really alive nor really dead Its dimensions are measured in molecules It attacks by dismantling its human targets cell by cell An ancient adversary resident on this earth long before our evolutionary ancestors arrived the virus is without conscience or compassion without mind It enjoys the advantages of countless numbers and infinite time It is a being almost too simple to understand and too basic to outwit We are locked in a war with the virus Each battle kills some of us The battles have many names Ebola Lassa fever Crimean Congo Hemorrhagic Fever AIDS Dr Joseph McCormick and Dr Susan Fischer-Hoch have met them all and they have fought them all *Level 4 Virus Hunters of the CDC* is their story It is an intense personal account of more than a quarter of a century on the front lines in the ultra high tech hot zone lab that McCormick was instrumental in creating at the Centers for Disease Control in Atlanta as well as in the

most primitive places on the planet where the local climate terrain and politics can kill as easily as any disease In the villages of Zaire and Sudan the ghettos and rain forest of Brazil and the nomadic settlements of northern Pakistan the cutting edge of science meets the deadly universe of viral disease The elite corps of virus hunters who dare to penetrate these realms combine the unquenchable curiosity and raw guts of intrepid explorers with the training of top level scientists the hunch playing passion of master sleuths and the compassion of truly great physicians Told in intimate detail by two of the world's best known virologists colleagues collaborators husband and wife Level 4 is a journey across the world and into many strange new worlds from the seductive beauty of equatorial Africa a limitless reservoir of infection to the confines of the all but invisible field of the electron microscope While other books have offered hot zones sick monkeys and grim statistics Level 4 brings home from the world of the virus the human stories of those who lived and those who died

Virus Hunter C. J. Peters, Mark Olshaker, 1997 The commander of the army virology unit that battled the Ebola virus in The Hot Zone and the current Chief of Special Pathogens at the Centers for Disease Control teams up with the bestselling coauthor of MindHunter to chronicle his extraordinary thirty year career fighting deadly viruses From Central and South America to a deadly outbreak of a mystery virus in the American Southwest from fieldwork in Egypt and the mountains of Kenya to immobilizing an army unit to stop a gut wrenching outbreak of Ebola only miles from Washington D C Virus Hunter takes us backstage in the inevitable clash between biology and human lives Because of new emerging viruses and the return of old vanquished ones for which vaccines do not exist there remains a very real danger of a new epidemic that could without proper surveillance and early intervention spread worldwide virtually overnight And the possibility of foreign countries or terrorist groups using deadly airborne viruses that are easily obtained rather than unwieldy explosives looms larger than ever in the future High octane science writing at its most revealing and best Virus Hunter is a thrilling first person account of what it is like to be a warrior in the Hot Zone

[A New Documentary History of Hong Kong, 1945-1997](#) Florence Mok, Fung Chi Keung Charles, 2025-03-17 In A New Documentary History of Hong Kong 1945 1997 Florence Mok Fung Chi Keung Charles and other contributors analyse newly released archival records from the National Archives in London the Government Records Service in Hong Kong and other sources across the world This documentary collection provides an updated and improved understanding of basic aspects of the city such as governance economy society and culture It also aims at investigating topics that are under exploited in previous sourcebooks such as race and diasporas gender and familial relations medicine and healthcare and environment and natural disasters Overall this book offers an innovative and comprehensive long term perspective of Hong Kong's colonial history This book is far more than a collection of historical documents it is a new history of Hong Kong from 1945 to 1997 As useful as these sources are for telling the history of Hong Kong during this period just as valuable are the introductions and commentaries by the contributors For while these sources tell us much about Hong Kong this book is a powerful testament to the fact that it is historians who make historical

documents speak and who give them meaning John M Carroll University of Hong Kong I find a commitment to academic sharing and altruism among the editors and contributors of this sourcebook They shared with us the documents they covered in their own research They identified those that were most relevant to capturing the essential features of Hong Kong society in their chosen areas of study Tai lok Lui Education University of Hong Kong A significant contribution from a new generation of Hong Kong historians this collective effort provides clear and concise accounts of various aspects of Hong Kong s history Their insights and meticulous work in uncovering archival materials and documentary sources will enable further inquiry and foster nuanced discussions among history enthusiasts and scholars Ray Yep University of Bristol

The Inherited Mind James Longman, 2025-01-07 A compelling memoir by ABC News correspondent James Longman in which he discusses mental illness and trauma in families what the latest genetic science is telling us and how to not only persevere but thrive James Longman was a preteen in boarding school when his dad who was diagnosed with depression and schizophrenia died by suicide As he got older James s own bouts of depression spurred him to examine how his father s mental health might have affected his own He engaged with experts to uncover the science behind what is inherited how much environmental factors can impact genetic traits and how one can overcome a familial history of mental illness and trauma In *The Inherited Mind* James Longman invites readers to reflect on their own stories as he shares his quest to better understand himself and his family Through speaking to mental health experts to those who have had similar familial experiences and about his own life stories James shows us with heart and humor how much our bodies can empower and inform us about our own personal mental health histories

[Lecture Notes on Emerging Viruses and Human Health](#) Colin R Howard, 2012-01-06 Emerging diseases are a major threat to modern societies impacting individual welfare as well as economic development The trend of newly emerging diseases has accelerated in the last two decades to such an extent that a new emerging infection is described at least once a year The majority of such threats to modern society have been due to emergent viruses This series of lecture notes provides grounding in understanding the drivers of disease emergence the molecular processes which allow for virus diversity the response of the host and environmental factors responsible for changing the balance between host and pathogen Groups of viruses are described each selected to illustrate certain features of disease emergence These examples best illustrate how from past experience we may best be able to predict future outbreaks of novel diseases Expecting the unexpected is a major challenge

for health care personnel and public health officials alike and the stakes have never been higher As such this book provides a timely overview of how best to prepare for disease emergence as it intends to increase awareness of how vulnerable modern society is in preparedness for such events

A Tale of Two Viruses Neeraja Sankaran,2021-03-09 In 1965 French microbiologist Andr Lwoff was awarded the Nobel Prize in Physiology or Medicine for his work on lysogeny one of the two types of viral life cycles which resolved a contentious debate among scientists about the nature of viruses A Tale of Two Viruses is the first study of medical virology to compare the history of two groups of medically important viruses bacteriophages which infect bacteria and sarcoma agents which cause cancer and the importance of Lwoff s discovery to our modern understanding of what a virus is Although these two groups of viruses may at first glance appear to have little in common they share uniquely parallel histories The lysogenic cycle unlike the lytic enables viruses to replicate in the host cell without destroying it and to remain dormant in a cell s genetic material indefinitely or until induced by UV radiation But until Lwoff s discovery of the mechanism of lysogeny microbiologist Felix d Herelle and pathologist Peyton Rous who themselves first discovered and argued for the viral identity of bacteriophages and certain types of cancer respectively faced opposition from contemporary researchers who would not accept their findings By following the research trajectories of the two virus groups Sankaran takes a novel approach to the history of the development of the field of medical virology considering both the flux in scientific concepts over time and the broader scientific landscapes or styles that shaped those ideas and practices

Polio David M. Oshinsky,2005-04-12 Here David Oshinsky tells the gripping story of the polio terror and of the intense effort to find a cure from the March of Dimes to the discovery of the Salk and Sabin vaccines and beyond Drawing on newly available papers of Jonas Salk Albert Sabin and other key players Oshinsky paints a suspenseful portrait of the race for the cure weaving a dramatic tale centered on the furious rivalry between Salk and Sabin He also tells the story of Isabel Morgan perhaps the most talented of all polio researchers who might have beaten Salk to the prize if she had not retired to raise a family Oshinsky offers an insightful look at the National Foundation for Infantile Paralysis which was founded in the 1930s by FDR and Basil O Connor it revolutionized fundraising and the perception of disease in America Oshinsky also shows how the polio experience revolutionized the way in which the government licensed and tested new drugs before allowing them on the market and the way in which the legal system dealt with manufacturers liability for unsafe products Finally and perhaps most tellingly Oshinsky reveals that polio was never the raging epidemic portrayed by the media but in truth a relatively uncommon disease But in baby booming America increasingly suburban family oriented and hygiene obsessed the specter of polio like the specter of the atomic bomb soon became a cloud of terror over daily life Both a gripping scientific suspense story and a provocative social and cultural history Polio opens a fresh window onto postwar America

Making Threats
Betsy Hartmann,Banu Subramaniam,Charles Zerner,2005 Today we live in times of proliferating fears The daily updates on the ongoing war on terror amplify fear and anxiety as if they were necessary and important aspects of our reality Concerns

about the environment increasingly take center stage as stories and images abound about deadly viruses alien species invasions scarcity of oil water food safety of GMOs biological weapons and fears of overpopulation Making Threats Biofears and Environmental Anxieties addresses how such environmental and biological fears are used to manufacture threats to individual national and global security Contributors from environmental studies political science international security biology sociology and anthropology discuss what they share in common the view that fears should be critically examined to avoid unnecessary alarm and scapegoating of people and nations as the enemy Other In these highly original and thought provoking essays Making Threats focuses on five themes security scarcity purity circulation and terror No other book has systematically examined the proliferation of fear in the context of current world events and from such a multidisciplinary perspective It consolidates in one place cutting edge research and reflection on how the contemporary landscape of fear shapes and is shaped by environmental and biological discourses By uncovering the linguistic tools that make fear resonate in the public consciousness by identifying the interests that create or are sustained by fears in short by giving fears histories Making Threats Biofears and Environmental Anxieties engages with some of the most potent and disturbing political and cultural aspects of the contemporary scene

Cinematic Encounters with Disaster Simon R. Troon, 2024-06-13 Cinematic Encounters with Disaster takes Hollywood's disaster movies and their codified versions of natural disaster post apocalyptic survival and extra terrestrial threat as the starting point for an analytical trajectory that works toward new understandings of how cinema shapes and informs our conceptions of disaster and catastrophe It examines a range of films from distinct regional and industrial contexts Hollywood indie movies different kinds of documentaries from the US and elsewhere and auteurist realist cinema from Europe and Asia Moving across and beyond critical and industrial categories that often inform thinking about cinema this book contends that different approaches to film style can push us to imagine disaster in distinct ways with distinct ethical connotations Framed by contemporary concerns around the global climate crisis and the advent of the Anthropocene questions about how films can best offer responses to historical exigency guide the book's explorations of spectacular 2010s blockbusters like Gravity

2013 and San Andreas 2015 environmental documentaries including the paradigmatic An Inconvenient Truth 2006 post disaster films by auteurs including Abbas Kiarostami and Lav Diaz and more Conceiving of disaster as intersubjective ethics between humans and nonhuman alterity forces of nature errant technology monsters ghosts and other entities it analyses how formal techniques and narrative strategies render encounters in which human protagonists are confronted with the threat of death and respond in ways that can be instructive for our planet s present juncture **Viral Haemorrhagic**

Fevers ,2004-12-09 In recent years there has been a resurgence of interest in studying infectious diseases especially given the alarming increase in the numbers of emerging diseases now confronting medical and veterinary science Viral Haemorrhagic Fevers describes the progress in research and our understanding of these agents against a backdrop of continuing fear these viruses engender among health care workers and the public alike It discusses how the study of these viral agents is directly applicable to other emerging diseases particularly in relation to how containing these outbreaks requires a high degree of collaboration between different specialists Primarily aimed at healthcare workers clinicians and microbiologists this book provides a rapid overview as to the nature of these widely varying agents linked only by their propensity of causing serious human disease *Deadliest Enemy* Mark Olshaker,Michael T. Osterholm,2017-03-14 A leading epidemiologist shares his powerful and necessary Richard Preston author of The Hot Zone stories from the front lines of our war on infectious diseases and explains how to prepare for global epidemics featuring a new preface on COVID 19 Unlike natural disasters whose destruction is concentrated in a limited area over a period of days and illnesses which have devastating effects but are limited to individuals and their families infectious disease has the terrifying power to disrupt everyday life on a global scale overwhelming public and private resources and bringing trade and transportation to a grinding halt In today s world it s easier than ever to move people animals and materials around the planet but the same advances that make modern infrastructure so efficient have made epidemics and even pandemics nearly inevitable And as outbreaks of COVID 19 Ebola MERS and Zika have demonstrated we are woefully underprepared to deal with the fallout So what can and must we do in order to protect ourselves from mankind s deadliest enemy Drawing on the latest medical science case studies policy research and hard earned epidemiological lessons *Deadliest Enemy* explores the resources and programs we need to develop if we are to keep ourselves safe from infectious disease The authors show how we could wake up to a reality in which many antibiotics no longer cure bioterror is a certainty and the threat of a disastrous influenza or coronavirus pandemic looms ever larger Only by understanding the challenges we face can we prevent the unthinkable from becoming the inevitable *Deadliest Enemy* is high scientific drama a chronicle of medical mystery and discovery a reality check and a practical plan of action Becoming a Dangerous Woman Pat Mitchell,2019-10-08 An intimate and inspiring memoir and call to action from Pat Mitchell groundbreaking media icon global advocate for women s rights and co founder and curator of TEDWomen Pat Mitchell is a serial ceiling smasher The first woman to own and host a nationally syndicated

daily talk show and the first female president of CNN productions and PBS Mitchell has been lauded as a powerful changemaker and a relentless advocate for women and girls In *Becoming a Dangerous Woman* Mitchell shares her own path to power from a childhood spent on a cotton farm in the South to her unprecedented rise in media and global affairs Full of intimate fascinating stories such as an encounter with Fidel Castro while wearing a swimsuit and traveling to war zones with Eve Ensler and Glenn *Becoming a Dangerous Woman* is an inspiring call to arms for women who are ready to dismantle the barriers they see in their own lives *Create Naturally* Marcia Young, 2022-11-22 15 makers present personal stories of how nature inspires and enhances their creativity For artists and crafters of all levels who look for inspiration in nature Stories and projects help you find ways to connect to nature with your own works **Planning Miracles** Jon Cohen, 2025-10-07 A groundbreaking book about the past present and future of pandemics and a behind the scenes portrait of the intrepid and innovative community of scientists working tirelessly to stop the next one before it starts In 1955 the vaccine that eliminated polio was celebrated as a planned miracle Today despite the astonishing global effort that came together to develop a vaccine for COVID 19 at unprecedented speed we struggle against the rise of science denial and misinformation Since 2020 we have had to face a terrifying truth It s not if we ll experience another pandemic it s when How do we prepare *Planning Miracles* tells the stories of the committed scientists at the front lines fighting back against societal distrust and panic monitoring the threats that exist detecting outbreaks early and developing new interventions as quickly as possible Renowned science reporter Jon Cohen travels from the mountains of Vietnam to the rainforests in the Amazon from the wet markets in Cambodia to fairgrounds in the United States exploring how we can better defend ourselves against the growing threat of pandemics and he finds surprising and encouraging answers Cohen meets scientists sampling bats pigs wild birds poultry and insects to hunt for the next dangerous virus He visits labs developing next generation vaccines with cutting edge technology that aim to protect us from entire viral families Cohen discovers the unexpected links between climate change and the spread of disease and describes efforts to improve the equitable distribution of vaccines diagnostics and data sharing around the world Weaving together history reportage and science writing *Planning Miracles* is revelatory and necessary providing hope that if we work together to plan for the next pandemic we can avoid disaster **Virus Mania** Torsten Engelbrecht, Claus Köhnlein, Samantha Bailey, Stefano Scoglio, 2021-04-22 The book *Virus Mania* has been written with the care of a master craftsman courageously evaluating the medical establishment the corporate elites and the powerful government funding institutions Wolfgang Weuffen MD Professor of Microbiology and Infectious Epidemiology The book *Virus Wahn* can be called the first work in which the errors frauds and general misinformations being spread by official bodies about doubtful or non virus infections are completely exposed Gordon T Stewart MD professor of public health and former WHO advisor The population is terrified by reports of so called COVID 19 measles swine flu SARS BSE AIDS or polio However the authors of *Virus Mania* investigative journalist Torsten Engelbrecht Dr Claus Köhnlein MD Dr Samantha Bailey

MD and Dr Stefano Scoglio BSc PhD show that this fearmongering is unfounded and that virus mayhem ignores basic scientific facts The existence the pathogenicity and the deadly effects of these agents have never been proven The book Virus Mania will also outline how modern medicine uses dubious indirect lab tools claiming to prove the existence of viruses such as antibody tests and the polymerase chain reaction PCR The alleged viruses may be in fact also be seen as particles produced by the cells themselves as a consequence of certain stress factors such as drugs These particles are then picked up by antibody and PCR tests and mistakenly interpreted as epidemic causing viruses The authors analyze all real causes of the illnesses named COVID 19 avian flu AIDS or Spanish flu among them pharmaceuticals lifestyle drugs pesticides heavy metals pollution malnutrition and stress To substantiate it the authors cite dozens of highly renowned scientists among them the Nobel laureates Kary Mullis Barbara McClintock Walter Gilbert and Sir Frank Macfarlane Burnet as well as microbiologist and Pulitzer Prize winner Ren Dubos and it presents more than 1 400 solid scientific references The topic of Virus Mania is of pivotal significance Drug makers and top scientists rake in enormous sums of money and the media boosts its audience ratings and circulations with sensationalized reporting the coverage of the New York Times and Der Spiegel are specifically analyzed The enlightenment about the real causes and true necessities for prevention and cure of illnesses is falling by the wayside For more reviews see the older edition of Virus Mania Global Pandemic Threats Michael C. LeMay, 2016-08-29 This book offers an accessible reference on epidemic and pandemic diseases that provides background information and history explains why pandemics are a newly emerging threat identifies the difficulties in coping with them and provides hope in the form of modern medicine Global Pandemic Threats A Reference Handbook provides all encompassing coverage that introduces key concepts and traces the history of pandemics enabling readers to grasp the complexity of the global problem and the difficulties of executing effective solutions Written in an easy to understand manner it provides a go to resource that systematically addresses dozens of diseases of the past as well as re emergent or newly emerging pathogens that have the potential of becoming pandemics The book s extensive coverage of past pandemics includes bubonic plague cholera influenza measles smallpox tuberculosis typhoid fever and yellow fever and the re emergence of malaria measles pertussis whooping cough poliomyelitis and other contagious diseases It discusses a broad range of newly emerging viral threats such as AIDS HIV avian flu anthrax botulism Ebola E coli Gulf War syndrome hanta virus Lassa virus Lyme disease Marburg virus MERS MRSA Ricin Sin Nombre virus SNV and West Nile virus The work offers perspectives from individuals interested and involved in the fight including medical professionals and health care workers profiles of key organizations and persons a helpful timeline of past and present pandemic outbreaks and a glossary of key terms and concepts **Microbial Musings** Debra Jan Bibel, 2001
