*Electronics Buying Guide*, 2008      **Mastering Cybersecurity** Akashdeep Bhardwaj, 2024-12-30 In today's ever evolving digital landscape cybersecurity professionals are in high demand. These books equip you with the knowledge and tools to become a master cyberdefender. The handbooks take you through the journey of ten essential aspects of practical learning and mastering cybersecurity aspects in the form of two volumes. Volume 1: The first volume starts with the fundamentals and hands on of performing log analysis on Windows and Linux systems. You will then build your own virtual environment to hone your penetration testing skills. But defense isn't just about identifying weaknesses; it's about building secure applications from the ground up. The book teaches you how to leverage Docker and other technologies for application deployments and AppSec management. Next, we delve into information gathering of targets as well as vulnerability scanning of vulnerable OS and Apps running on Damn Vulnerable Web Application (DVWA), Metasploitable2, Kioptrix and others. You'll also learn live hunting for vulnerable devices and systems on the Internet. Volume 2: The journey continues with volume two for mastering advanced techniques for network traffic analysis using Wireshark and other network sniffers. Then we unlock the power of open source intelligence (OSINT) to gather valuable intel from publicly available sources including social media, web images and others. From there, explore the unique challenges of securing the Internet of Things (IoT) and conquer the art of reconnaissance, the crucial first stage of ethical hacking. Finally, we explore the dark web, a hidden corner of the internet, and learn safe exploration tactics to glean valuable intelligence. The book concludes by teaching you how to exploit vulnerabilities ethically during penetration testing and write pen test reports that provide actionable insights for remediation. The two volumes will empower you to become a well rounded cybersecurity professional prepared to defend against today's ever increasing threats.

**Issues in Media** CQ Researcher, 2018-10-03 What is the future of television? Do social media and big data threaten privacy rights? Do children have too much access to violent media content? Is reporting on global conflict worth the risk? These questions and many more are at the heart of today's media landscape. Written by award winning CQ Researcher journalists, this collection of non-partisan reports focuses on fifteen hot button issues impacting the media. With reports ranging from the fight over net neutrality to social media and politics, *Issues in Media* promotes in-depth discussion, facilitates further research and helps readers formulate their own positions on crucial issues. And because it's CQ Researcher, the reports are expertly researched and written, presenting readers with all sides of an issue.

**Key Features:** Chapters follow a consistent organization beginning with a summary of the issue, then exploring a number of key questions around the issue, next offering background to put the issue into current context and concluding with a look ahead. A pro/con debate box in every chapter offers readers the opportunity to critically analyze and discuss the issues by exploring a debate between two experts in the field. All issues include a chronology, a bibliography, photos, charts and figures to offer readers a more complete picture of the issue at hand.
