Fundamental Analysis and Position Trading Thomas N. Bulkowski, 2012-12-10. Comprehensive coverage of the four major trading styles. *Evolution of a Trader* explores the four trading styles that people use when learning to trade or invest in the stock market. Often beginners enter the stock market by buying and holding onto a stock, value investing. That works well until the trend ends or a bear market begins. Then they try position trading. This is the same as buy and hold except the technique sells positions before a significant trend change occurs. Swing trading follows when traders increase their frequency of trading, trying to catch the short term up and down swings. Finally, people try day trading by completing their trades in a single day. This series provides comprehensive coverage of the four trading styles by offering numerous tips, sharing discoveries, and discussing specific trading setups to help you become a successful trader or investor as you journey through each style. *Trading Basics* takes an in-depth look at money management, stops, support and resistance, and offers dozens of tips every trader should know. *Fundamental Analysis and Position Trading* discusses when to sell a buy and hold position, uncovers which fundamentals work best, and uses them to
