Alternating vs Solid Text

Alternating Text Alternating Text Parallel text or interlinear text is when your target language in this case Italian is presented with the translation directly to the side or below respectively A text may be presented with the literal translation of every word or a sentence paragraph translated into a more colloquial or natural way of expressing an idea We find this second way to be of more value as it emphasizes patterns which are critical to learning any language and as you will see most languages have unique idioms An idiom is a phrase or pattern that expresses something other than its literal meaning like what's up You're asking how someone is doing not what's above them in the sky Alternating text has many advantages over a traditional text body Mainly you are able to very quickly glance down to see the translation of the idea your reading in Italian No time is wasted flipping through glossaries and you don't risk losing your place in the book because the translated idea is presented right there on the same page within a glance reach

Solid Text A traditional text body or text written entirely in one language has advantages of its own Mainly you are forced to interpret new or unfamiliar words based upon the context and your own memory Context is extremely important not only in grasping the true meaning of what is being said but developing your capability to infer what new words mean This skill is of the utmost value When you meet a Italian speaker for the first time odds are they will say a thing or two that you don't know or can't understand Your ability to infer the meaning of a given word can greatly improve the quality of such an experience This will expedite the learning curve and boost confidence It is inevitable that you will make mistakes don't let that stop you from conquering a new language

Solid text also forces you to recall definitions sentence patterns and the meaning of various expressions Without a quick translation available you will be challenged and grow

Alternating Traditional So which style of text did we choose to include in this book Well each is so valuable that we couldn't pick one over the other Thus we included BOTH We've presented the story first in its entirety with a Italian and English alternating text Each paragraph is presented with its translation below

Second we presented the entire story in Italian So now you can use this awesome tool in a way that best suits you and your growing level of understanding So if you're interested in finally picking up Italian you're just a click away
