The Lies That Bind English Edition:

The Lies that Bind Kwame Anthony Appiah, 2018-08-28 A Washington Post Notable Book of the Year As seen on the Netflix series Explained From the best selling author of Cosmopolitanism comes this revealing exploration of how the collective identities that shape our polarized world are riddled with contradiction Who do you think you are That's a question bound up in another What do you think you are Gender Religion Race Nationality Class Culture Such affiliations give contours to our sense of self and shape our polarized world Yet the collective identities they spawn are riddled with contradictions and cratered with falsehoods Kwame Anthony Appiah's *The Lies That Bind* is an incandescent exploration of the nature and history of the identities that define us It challenges our assumptions about how identities work We all know there are conflicts between identities but Appiah shows how identities are created by conflict Religion he demonstrates gains power because it isn't primarily about belief Our everyday notions of race are the detritus of discarded nineteenth century science Our cherished concept of the sovereign nation of self rule is incoherent and unstable Class systems can become entrenched by efforts to reform them Even the very idea of Western culture is a shimmering mirage From Anton Wilhelm Amo the eighteenth century African child who miraculously became an eminent European philosopher before retiring back to Africa to Italo Svevo the literary marvel who changed citizenship without leaving home to Appiah's own father Joseph an anticolonial firebrand who was ready to give his life for a nation that did not yet exist Appiah interweaves keen edged argument with vibrant narratives to expose the myths behind our collective identities These mistaken identities Appiah explains can fuel some of our worst atrocities from chattel slavery to genocide And yet he argues that social identities aren't something we can simply do away with They can usher in moral progress and bring significance to our lives by connecting the small scale of our daily existence with larger movements causes and concerns Elaborating a bold and clarifying new theory of identity *The Lies That Bind* is a ringing philosophical statement for the anxious conflict ridden twenty first century This book will transform the way we think about who and what we are *It's Nation Time* Jerry White, 2024-10-01 Speaking at the Congress of African People in September 1970 Amiri Baraka said In Newark when we greet each other on the streets we say what time is it We always say It's nation time Nationalism is about land and nation a way of life trying to free itself National identity and nationhood are too often easily dismissed as retrograde populism or racist exclusion Instead they need to be understood as a key part of a vision of globalization that holds the imperatives of diversity and solidarity in a delicate balance Jerry White offers a defence of the nation based on the assumption that struggles for national identity have often unfolded in ways that should be familiar to those who defend the political standpoint of the progressive left Having evolved into something that a wide variety of actors have sought to defend nations can also serve as a defence against the homogenizing forces of globalization and as havens of diversity in opposition to more singularly minded forms of affiliation It's *Nation Time* is structured as a series of specific case studies that speak to theories of nation and their historical and

cultural manifestations It includes examples as varied as Black nationalism Simone Weil's hopes for a postwar France the first independence period of Georgia the Bollywood cinema of Nehru era India and small or stateless nations such as New Zealand Quebec Ireland Catalonia the M'tis the Mohawk and the Inuit to argue that nationalism is a social form that has much potential and life in it Broadly internationalist but also deeply insightful about the particular cultures and politics of small nations It's Nation Time defends an idea of nation and a form of nationalism that are rooted in the potential for diversity flexibility and progressive politics

Body and Identity Angela Franks, 2025-08-15 Angela Franks provides a sweeping intellectual history of identity particularly in terms of how identity relates to the body with an emphasis on the importance of Christianity to this understanding Modern questions about our bodies and how we see ourselves are often complex and problematic To better answer these contemporary questions and navigate identity politics Angela Franks seeks to provide a better understanding of identity She begins by giving three basic meanings of the term identity through time the true or authentic self and our awareness of ourselves She engages with thinkers from antiquity to present day and investigates the decisive developments that Christianity provided Within Christianity came a new awareness of the distinctive individuality of each person the true self called by God in a way that often breaks away from the solid or fixed structures of identity formation such as family class and nation This more liquid idea of identity continues to evolve in modern times though without its theistic emphasis on God's call The result is a purely liquid self that consists of consciousness and activity but without a grounded self that is either the object or the subject of consciousness This is the empty self we have today one that is given much more to do and less to be A comprehensive history of identity *Body and Identity* brings the theological history of the self to the forefront in order to address the empty self and how identity is defined today

Philosophy of Marketing Matteo Giannasi, Francesco Casarin, 2021-09-27 How can we overcome the rapidly ageing postmodernist paradigm which has become sterile orthodoxy in marketing This book answers this crucial question using fresh philosophical tools developed by New Realism It indicates the opportunities missed by marketing due to the pervasive postmodernist ideology and proposes a new and fruitful approach pivoting on the significance of reality to marketing analyses and models Intensifying reference to reality will boost marketing research and practice rather than impair them conversely neglecting such a reference will prevent marketing from realising its full potential in several contexts The aim of the book is foundational its purpose is not a return to traditional realism but to break new ground and overcome theoretical obstacles in marketing and management by revising some of their assumptions and enriching their categories thereby paving the way to fresh approaches and methodological innovations In that sense the book encourages theoretical innovation and experimentation and introduces new concepts like invitation and attrition which can find fruitful applications in marketing theory and practice That is meant to be conducive to the solution of important difficulties and to the uncovering of new phenomena The last chapter of the book applies the new approach to eight case studies from business contexts This book will

be of interest to philosophers interested in New Realism and to researchers scholars and marketing professionals sensitive to the importance and fruitfulness of reference to reality for their own purposes *The construction of multilinguals as Others* Artemis Alexiadou, Claudio Scavarglieri, Christoph Schroeder, Heike Wiese, 2025-09-19 Multilingualism is the normal condition for contemporary as well as historical human societies However European nation state building has led to a strong monolingual habitus that constructs a community of monolingual speakers as bearers of a nation This erases or exoticises multilinguistic practices and excludes multilingual speakers The effects of this exclusion are visible in the public discourse on multilingual speakers where we find a widespread Othering of multilingual speakers understood as constructing them as members of a social and linguistic out group Such Othering is not restricted to public discourse but is also found in our own practice as professionals working in linguistics and related fields In the volume we take a close look at Othering practices not only in the public discussion and educational practice but also in academia with a focus on linguistics We provide critical reflection of common practices in our own field and discuss the implications and challenges of this for our research Chapters will address conceptual framing and labelling methodology and research bias in a broad spectrum of approaches They will discuss the social context of Othering in linguistics labelling practises in linguistic publications and the construction of multilinguals as Others in linguistic subdisciplines such as heritage language research descriptive and documentary linguistics second language acquisition language teaching and outreach activities **Broadcast** Nehemiah Adams, 1863
