

Sir Isaac Newton

Isaac Newton was born on Dec. 25, 1642 in Woolsthorpe, Lincolnshire, England. He was expected to become a farmer like his late father, but he lacked the skills. Instead, he studied math and science at Trinity College, Cambridge, where he eventually became a professor in 1669.

While teaching at Cambridge, Newton published his most influential paper on modern science in 1687 titled, "The Mathematical Principles of Natural Philosophy;" the *Principia*. Inside the publication, were his Laws of Motion, which initially gave Newton his fame.

Years later, Newton retired from Cambridge in 1696, and began working for the Royal Mint (coin manufacturers); yet, he didn't stop dabbling in science. He enjoyed experimenting with prisms and found that light passing through a prism created a spectrum of colors. After numerous experiments, he published his theory of light in *Optics*. One year after its publication, Queen Anne knighted Newton in recognition of his scientific achievements.

On March 20, 1727, at the age of 85, Sir Isaac Newton passed away in his sleep. He was laid to rest at Westminster Abbey.

This book deals with the life and the story of Isaac Newton, the great scientist known as mathematician, astronomer, and natural philosopher. An honest farmer, neither rich nor poor, was Isaac Newton. He was married to Harriet Ayscough in February Sixteen Hundred Forty-two. Both were strong, intelligent, and full of hope. Neither had any education to speak of; they belonged to England's middle class, that oft despised and much ridiculed middle class. Which is the hope of the world. Accounts still in existence show that their income was thirty pounds a year. It was for them to toil all the week, go to church on Sunday, and twice or thrice in a year attend the village fairs or indulge in a holiday where hard cider played an important part. The verdict of humanity concerning Sir Isaac Newton has been summed up for us thus by Laplace: His work was pre-eminent above all other products of the human intellect.
