Political Settlements and Development Tim Kelsall, Nicolai Schulz, William D. Ferguson, Matthias vom Hau, Sam Hickey, Brian Levy, 2022-05-05 Few concepts have captured the imagination of the conflict and development community in recent years as powerfully as the idea of a political settlement At its most ambitious political settlements analysis PSA promises to explain why conflicts occur and states collapse the conditions for their successful rehabilitation different developmental pathways from peace and how to better fit development policy to country context Yet not all is well in the world of PSA Rival definitions of the term abound there are disagreements about its scope and the way it should be used a growing schism between conflict specialists and economists basic concepts are ambiguous and little progress has been made on measurement Political Settlements and Development consequently has three main aims to argue for a revised definition of a political settlement capable of unifying its diverse strands and opening new opportunities for the analysis of conflict and development to put the concept on a more solid theoretical and scientific footing providing a method for measuring and categorising political settlements while using new data to analyse the relationship between political settlements and development and finally to examine the implications

50 Years of Central Banking in Kenya Patrick Njoroge, Victor Murinde, 2021-04-01 Documenting important milestones in the epic journey traversed by the Central Bank of Kenya CBK over the last 50 years *50 Years of Central Banking in Kenya* puts into perspective the evolution of central banking globally and within the East African region and contemplates future prospects and challenges The volume is timely mainly because within the last 50 years the global financial landscape has shifted Central bankers have expanded their mandates beyond the singular focus on inflation and consider economic growth as their other important objective Bank regulation has moved from Basel I to Basel II and some countries have fully migrated to Basel III while some are still at the cross roads *50 Years of Central Banking in Kenya* captures the wide ranging discussions on central banking from a symposium to celebrate the 50 year anniversary on 13 September 2016 in Nairobi The participants at the symposium included current and former central bank governors from Kenya and the East Africa region high level officials from multilateral financial institutions policy makers executives of commercial banks in Kenya private sector practitioners civil society agents executives and researchers from think tanks based in Kenya and the Africa region leading academics in banking and finance and university students Beyond the symposium the volume highlights the evolution of specific functions of CBK over the last 50 years such as monetary policy bank regulation and payments system as well as developments in Kenya's financial system which strongly relate to the functionality of CBK such as financial innovation the evolution of financial markets and non bank financial institutions in Kenya [The Big Business of Small Enterprises](#) World Bank, 2015-02-13 The World Bank Group promotes small and medium enterprise SME growth through both systemic and targeted interventions Targeting means focusing benefits on one size class of firms to the exclusion of others Targeted support for SMEs is a big business for the World Bank Group averaging around 3 billion a year in commitments expenditures and gross exposure over the 2006 12 period In the context of broader reforms such targeted support can be a powerful tool Targeting SMEs is not an end in itself but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity A thriving and growing SME sector is associated with rapidly growing economies A central challenge is to level the economic playing field by ensuring dynamic markets strengthening market support institutions and removing constraints to participation IEG found that financial sector development can have both a pro growth and pro poor impact by alleviating SMEs financing constraints enabling new entry of firms and entrepreneurs and better resource allocation Layered on top of this are targeted forms of assistance these interventions may build on a foundation of more systemic reforms may come in tandem with them or may in fact be a means to build systemic reforms from the bottom up Any credible justification of targeted support to SMEs must be focused on establishing well functioning markets and institutions not simply providing a temporary supply of benefits to a small group of firms during a project's

lifespan Thus targeted interventions need to leverage resources to produce broader benefits for institutions and markets To make targeted support for SMEs more effective the World Bank Group needs to do several things Clarify its approach to targeted support to SMEs Enhance the support s relevance and additionality Institute a tailored research agenda Strengthen guidance and quality control for such support Reform MIGA s Small Investment Program The Paris Framework for Climate Change Capacity Building Mizan R Khan,J.
