The Long Tail How Endless Choice Is Creating Unlimited Demand:

The Long Tail Chris Anderson, 2007 What happens when there is almost unlimited choice When everything becomes available to everyone And when the combined value of the millions of items that only sell in small quantities equals or even exceeds the value of a handful of best sellers In this ground breaking book Chris Anderson shows that the future of business does not lie in hits the high volume end of a traditional demand curve but in what used to be regarded as misses the endlessly long tail of that same curve As our world is transformed by the Internet and the near infinite choice it offers consumers so traditional business models are being overturned and new truths revealed about what consumers want and how they want to get it Chris Anderson first explored the Long Tail in an article in Wired magazine that has become one of the most influential business essays of our time Now in this eagerly anticipated book he takes a closer look at the new economics of the Internet age showing where business is going and exploring the huge opportunities that exist for new producers new e tailers and new tastemakers He demonstrates how long tail economics apply to industries ranging from the toy business to advertising to kitchen appliances He sets down the rules for operating in a long tail economy And he provides a glimpse of a future that s already here publishers description

The Longer Long Tail Chris Anderson, 2009 What happens when there is almost unlimited choice When everything becomes available to everyone And when the combined value of the millions of items that only sell in small quantities equals or even exceeds the value of a handful of best sellers In t

The Long Tail Chris Anderson, 2006 The concept of the long tail refers to the hundreds of products that are not bestsellers i e those products that form a line that tails off down any company s sales graph This book looks at how the Internet has allowed for a boom in such niche market products

The Long Tail Chris Anderson, 2006 Like the tipping point the long tail is a concept that is so obvious and so right that it seems extraordinary that no one has articulated it before The long tail refers to the hundreds of thousands of products that are not number one bestsellers If you were to plot a graph of a company s products ranging them from the bestselling to the least popular along the bottom axis and plotting sales figures against the vertical axis then you d see the line sort of tailing off as products become less popular The bestsellers may sell in their thousands but others sell only in hundreds or maybe even tens However there are so many of these products that if you add up their total sales they are quite often more profitable than bestsellers These products from the part of the sales graph that tails off are the long tail and these products are changing the face of the entertainment industry When Chris Anderson identified this trend in Wired magazine in the autumn of 2004 he explained how in an era of almost limitless choice many consumers will gravitate toward the most popular mass market items but just as many will move toward items that only a few niche market people want Take music in an age of Amazon com and iTunes A lot of music buyers want the hot new releases But just as many buy music by lesser known artists or older music songs that record stores never would be able to carry but that can be offered online All that niche market off mainstream music is part of the long tail and makes a significant

contribution to profits In this new digital era the long tail is a powerful force that is challenging the might of the mass market

Regulation, Governance and Convergence in the Media Peter Humphreys, Seamus Simpson, 2018-08-31 Media convergence is often propounded as inevitable and ongoing Yet much of the governance of the media sector's key parts has developed along discrete evolutionary paths mostly incremental in character This volume breaks new ground through exploring a diverse range of topics at the heart of the media convergence governance debate such as next generation networks spectrum copyright and media subsidies It shows how reluctance to accommodate non market based policy solutions creates conflicts and problems resulting in only shallow media convergence thus far **American Independent Cinema** Geoff King, Claire Molloy, Yannis Tzioumakis, 2013 The American independent sector has attracted much attention in recent years an upsurge of academic work on the subject being accompanied by wider public debate But many questions remain about how exactly independence should be defined and how its relationship might be understood with other parts of the cinematic landscape most notably the Hollywood studios Edited and written by leading authors in the field American Independent Cinema indie indiewood and beyond offers an examination of the field through four sections that range in focus from broad definitions to close focus on particular manifestations of independence A wide variety of examples are included but within a framework that offers insights into how these are related to one another More specifically this collection offers an account of recent developments as well as reviewing reassessing and revising a number of central positions approaches and arguments relating to various parts of the independent and or indie sector Individual case studies that range from the distinctive qualities of the work of established quality filmmakers such as Wes Anderson Steven Soderbergh and Rebecca Miller to studies of horror genre production at the more disreputable end of the independent spectrum Examples of the limits of independence available in some cases within Hollywood including studies of the work of Stanley Kubrick and Hal Ashby Case studies of under researched areas in the margins of American independent cinema including the Disney nature films and Christian evangelical filmmaking A number of wider overview chapters that examine contemporary American independent cinema from a number of perspectives Together the chapters in the collection offer a unique contribution to the study of independent film in the United States Contributors Warren Buckland Philip Drake Mark Gallagher Geoff King Peter Kr mer Novotny Lawrence James MacDowell Claire Molloy Michael Z Newman Alisa Perren James Russell Thomas Schatz Michele Schreiber Janet Staiger Yannis Tzioumakis Sarah Wharton Changing Face of Information: Support Services for Scientific Research David J. Brown, 2020-01-20 The health of scientific enterprise has become a critical political and social issue as nation states tackle austerity diversity global challenges whilst simultaneously supporting a competitive and innovative national economy A key asset in achieving such ambitions is for a scholarly information system which enables the fruits of the research effort to be disseminated efficiently As the information support system struggles with adapting from a print based to a digital process the dysfunctionality current within STEM publishing in particular becomes evident New ways

of supporting research are emerging which require a new approach to publishing an approach which takes on board the many demographic social technical and administrative changes taking place in both science itself and society A radical strategic assessment is required and this book tracks key aspects required for any new future strategy This book provides a catalogue of issues to which a future STEM information industry will need to adapt They range from the effects of technology on the neurological processes of research to the growing use of technology to speed up the exchange of information among groups and laboratories from considerations about quality control yet maintaining intellectual ownership from changing from an elitist STEM system favouring academics to a more democratic process with wider appeal There is the neglected non academic market and its need to share in the results of the research effort often through partnership and being part of a hive mind This is the large world of the unaffiliated knowledge workers of which academia is numerically but a small part The many changes taking place in scholarly information dictate that the future is unlikely to be a smooth and gradual evolution from the past Radical new approaches are required a revolution which takes on board the perfect storm of changes listed in this book Just as such changes have changed the face of industries such as music and retail in recent years so similar dramatic changes are likely to result in a restructuring of STEM into a more technologically focused industry within the next decade The implications for the current STEM stakeholders are profound *The Fundamentals of Design Management*

Kathryn Best,2017-11-02 The book explicitly places the principles and processes of design within the context of a business or enterprise explaining how design management can relate to the cultural environmental political and social impact of an enterprise It emphasises the inter disciplinary nature of design management and as such is of relevance to students of a number of disciplines from art and design to business marketing or media The Fundamentals of Design Management is supported throughout by a range of interviews and case studies taken from design practitioners and industry experts

Cinéma&Cie 29 Stefano Baschiera,Francesco Di Chiara,Valentina Re,2018-12-14T00:00:00+01:00 This special issue of Cin ma Cie analyses the logic and processes of re intermediation emerging in the contemporary European media industry landscape providing an opportunity to bring questions of availability text circulation and gatekeeping to the centre of scholarly debates and investigations Through contributions showcasing a wide array of methodological and theoretical approaches the volume illustrates and analyses the presence of new gatekeepers their impact in shaping texts and their consumption in different European contexts Its case studies include file sharing Curzon Home Cinema VOD services and the problematic implementation of the Digital Single Market policy The Psychology of Social Networking Vol.1 Giuseppe Riva,Brenda K. Wiederhold,Pietro Cipresso,2015-01-01 Using a novel approach to consider the available literature and research this book focuses on the psychology of social media based on the assumption that the experience of being in a social media has an impact on both our identity and social relationships In order to be online an individual has to create an online presence they have to share information about themselves online This online self is presented in different ways with diverse

goals and aims in order to engage in different social media activities and to achieve desired outcomes Whilst this may not be a real physical presence that physicality is becoming increasingly replicated through photos video and ever evolving ways of defining and describing the self online Moreover individuals are using both PC based and mobile based social media as well as increasingly making use of photo and video editing tools to carefully craft and manipulate their online self This book therefore explores current debates in Cyberpsychology drawing on the most up to date theories and research to explore four main aspects of the social media experience communication identity presence and relationships In doing so it considers the interplay of different areas of psychological research with current technological and security insight into how individuals create manipulate and maintain their online identity and relationships The social media are therefore at the core of every chapter with the common thread throughout being the very unique approach to considering diverse and varied online behaviours that may not have been thus far considered from this perspective It covers a broad range of both positive and negative behaviours that have now become integrated into the daily lives of many westernised country s Internet users giving it an appeal to both scholarly and industry readers alike

Song Lyrics and Literary History Gunilla

Hermansson,2025-06-12 Paving new paths for the study of the history of literature this study explores the intricate networks of one single poem across two centuries the V rvindar friska a poem meant to be sung The Swedish song V rvindar friska Fresh Spring Breezes started its public life in 1828 between the covers of a book as a poem written to a traditional melody Since then it has been reprinted translated performed and used in the most surprising contexts in different corners of the world This particular case may be rather exceptional but Gunilla Hermansson argues that the underlying dynamics are not and yet they have been underexposed in studies of literary history This exploration of V rvindar friska reveals the rich and intricate network of one text and uncovers new facets of how people have engaged with word art in their everyday lives in the modern era This network includes untraditional yet widespread uses of poetry and lyrics in lonely hearts columns and railway work and seemingly strange bedfellows such as a constellation of Nordic folk songs and American plantation songs The afterlives of this song evoke questions concerning class gender race citizenship technology and modernity from new angles as well as theoretical and methodological questions of circulation textual instability canonization paradigmatic turns uses and misuses Song Lyrics and Literary History demonstrates how poetry is transformed when shared across time borders media and social and ideological divides Being attentive to poetry meant to be sung Hermansson argues opens to a fuller and more representative picture of the cultural history of literature

Film Authorship in

Contemporary Transmedia Culture Wikanda Promkhuntong,2025-10-01 Film Authorship in Contemporary Transmedia

Culture The Paratextual Lives of Asian Auteurs examines film authorship in the transmedia era whereby film directors have

become public figures through a wide range of textual material and performative practices The book draws on the notion of paratext and its related term palimpsest to bring forth the idea of self reflexive authorship as a method of examining the mediated past present and afterlife of East Asian filmmakers The first part of the book pays attention to materials surrounding film festivals multi platform distribution and cinephile fan creative practices which have been created rewritten and shared to foster and problematize the reputations of selected filmmakers The second part examines alternative modes of self projections and creative productions that address the filmmakers sense of selves and relations with the industry and the public Across different chapters discourses surrounding film authorship and East Asian cinema are revisited and expanded to highlight its multiple histories and possible futures

Access to Scientific Research David J. Brown, 2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future

The People's Pictures James Caterer, 2011-08-08 When John Major launched the UK's National Lottery in 1994 he christened it the people's Lottery and handed it to the mythical stewardship of the Everyman But when the proceeds began to be distributed to worthy causes including the British film industry this populist rhetoric came under increasing strain If Lottery funding is used to produce the type of British films which the public want to see such as romantic comedies then many question whether the market deserves such subsidy Short films and low budget experimental cinema which often require state support tend to go unwatched by large swathes of the Lottery ticket buying public This book explores the debates which were sparked by the arrival of the people's pictures and places them in historical context by examining their many precedents Is public patronage a boon or a burden for filmmakers And how do institutional cultures or political buzzwords affect the finished films Case studies include the popular hits Billy Elliot 2000 and Shooting Fish 1997 art house releases such as Love Is The Devil 1998 and Gallivant 1997 short films by Lynne Ramsey and David MacKenzie and artists film and video work by Bill Viola and Tracey Emin

Music Making and Civic Imagination Dave Camlin, 2023-08-08

In a world facing multiple existential crises music might be seen as little more than a distraction However in this synthesis of ideas developed over a decade a timely re appraisal of the potential of musicing for human flourishing is presented emphasising its role in the history of human evolution alongside its potential as a resource for sustainable development A holistic philosophy of music is outlined which recognises the complex web of meaning which spreads across complementary musical dimensions of performance and participation whilst emphasising the paramusical benefits which arise from both Highlighting the notion that the social bonds which arise from musicing share much of the neurobiological underpinnings of attachment and love musicing is presented as a resource with the potential for facilitating ethical human connection The humanistic values which are thereby materialised during musicing love reciprocity and justice form the experiential grounds for inhabiting alternative social realities The book addresses how such a holistic philosophy of music might be implemented in practice drawing on the author s professional praxis as a performer educator community musician composer and researcher in particular their experience of musician education at Sage Gateshead Royal College of Music and Trinity Laban Conservatoire in the UK
