Virginia A. Arnold,1989 **Learner-Centered Teaching Activities for Environmental and Sustainability Studies** Loren B. Byrne,2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information develop skills via hands on engagement and encourage personal reflection through metacognitive tasks In addition learner centered classroom approaches may challenge students preconceived notions and expand their thinking by confronting them with thought provoking statements tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work group discussions service and project based learning and student led research among others Unfortunately it is often not possible to use some of these valuable methods in all

course situations given constraints of money space instructor expertise class meeting and instructor preparation time and the availability of prepared lesson plans and material Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses The broad goal of this volume is to help advance environmental education practices that help increase students environmental literacy Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge skills and personal views about many contemporary environmental and sustainability issues *Catalog of Copyright Entries. Magic, Madness, and Mischief Kelly McCullough,2018-01-09 From the author of *School for Sidekicks* comes a witty and thoughtful middle grade fantasy about the bonds of family and the strength of true friendship Kalvan Monroe is worried Either he s going mad or he really did wake up with uncontrollable fire magic and accidentally summon a snarky talking fire hare Yes that s right a hare Made of fire That talks He s got to be going crazy right But if he s not then magic actually is real

and he's got even more problems to worry about. Because Kalvan isn't the only one with powers. The same fire magic that allows him to talk his way into and out of trouble burned too brightly in his mother, damaging her mind and leaving her vulnerable to the cold manipulative spells of the Winter King. Can Kalvan gain control of his power in time to save his mother, or will their fires be snuffed out forever? Kelly McCullough combines Magic, Madness, and Mischief as well as danger in a delightful fantasy set in a magical version of St. Paul, Minnesota.
