The Making Of A World City London 1991 To 2021:

The Making of a World City Greg Clark, 2014-10-16 After two decades of evolution and transformation London had become one of the most open and cosmopolitan cities in the world The success of the 2012 Olympics set a high water mark in the visible success of the city while its influence and soft power increased in the global systems of trade capital culture knowledge and communications The Making of a World City London 1991 2021 sets out in clear detail both the catalysts that have enabled London to succeed and also the qualities and underlying values that are at play London s openness and self confidence its inventiveness influence and its entrepreneurial zeal London s organic unplanned incremental character without a ruling design code or guiding master plan proves to be more flexible than any planned city can be Cities are high on national and regional agendas as we all try to understand the impact of global urbanisation and the re urbanisation of the developed world If we can explain London s successes and her remaining challenges we can unlock a better understanding of how cities succeed

The Desecularisation of the City David Goodhew, Anthony-Paul Cooper, 2018-09-21 Major cities have long been seen as centres of secularisation However the number of congregations in London grew by 50% between 1979 and the present London s churches have been characterised more by growth than by decline in the decades since 1980 The Desecularisation of the City provides the first academic survey of churches in London over recent decades linking them to similar developments in other major cities across the West Produced by a large team of scholars from a range of disciplines this volume offers a striking and original portrait of congregational life in London since 1980 Seventeen chapters explore the diverse localities ethnicities and denominations that make up the church in contemporary London The vitality of London s churches in the last four decades shows that secularisation is far from inevitable in the cities of the future This study necessitates a significant reassessment of the dominant academic portrayal of Christianity in Britain and the West which has mostly depicted cities as secular spaces within a secularising culture It will be of great interest to scholars working across a wide range of disciplines including history sociology religious studies and theology

Migrant City Panikos Panayi, 2020-04-07 The first history of London to show how immigrants have built shaped and made a great success of the capital city London is now a global financial and multicultural hub in which over three hundred languages are spoken But the history of London has always been a history of immigration Panikos Panayi explores the rich and vibrant story of London from its founding two millennia ago by Roman invaders to Jewish and German immigrants in the Victorian period to the Windrush generation invited from Caribbean countries in the twentieth century Panayi shows how migration has been fundamental to London s economic social political and cultural development Migrant City sheds light on the various ways in which newcomers have shaped London life acting as cheap labour contributing to the success of its financial sector its curry houses and its football clubs London s economy has long been driven by migrants from earlier continental financiers and more recent European Union citizens Without immigration fueled by globalization Panayi argues London would not have

become the world city it is today *Migration and the European City* Christoph Cornelißen, Beat Kümin, Massimo Rospocher, 2022-03-07 Looking back over the centuries migration has always formed an important part of human existence Spatial mobility emerges as a key driver of urban evolution characterized by situation specific combinations of opportunities restrictions and fears This collection of essays investigates interactions between European cities and migration between the early modern period and the present Building on conceptual approaches from history sociology and cultural studies twelve contributions focus on policies representations and the impact on local communities more generally Combining case studies and theoretical reflections the volume s contributions engage with a variety of topics and disciplinary perspectives yet also with several common themes One revolves around problems of definition both in terms of demarcating cities from their surroundings and of distinguishing migration in a narrower sense from other forms of short and long distance mobility Further shared concerns include the integration of multiple analytical scales contextual factors and diachronic variables such as urbanization industrialization and the digital revolution

Steering the Metropolis Inter American Development Bank, United Nations Human Settlements Programme, Development Bank of Latin America, 2017-10-24 A distinctive feature of urbanization in the last 50 years is the expansion of urban populations and built development well beyond what was earlier conceived as the city limit resulting in metropolitan areas This is challenging the relevance of traditional municipal boundaries and by extension traditional governing structures and institutions Steering the Metropolis Metropolitan Governance for Sustainable Urban Development encompasses the reflections of thought and practice leaders on the underlying premises for governing metropolitan space sectoral adaptations of those premises and dynamic applications in a wide variety of contexts Those reflections are structured into three sections Section 1 discusses the conceptual underpinnings of metropolitan governance analyzing why political technical and administrative arrangements at this level of government are needed Section 2 deepens the discussion by addressing specific sectoral themes of mobility land use planning environmental management and economic production as well as crosscutting topics of metropolitan governance finance and monitoring and evaluation Section 3 tests the concepts and their sectoral adaptations against the practice with cases from Africa America Asia and Europe

Destination London Andrew Smith, Anne Graham, 2019-05-21 London is one of the world's most popular destinations and visitors contribute approximately 14.9 billion of expenditure to the city every year Its tourism and events sectors are growing and over the last few years London has received more visitors than ever before However detailed accounts of the city's visitor economy are conspicuously absent This book analyses how the capital is developing as a destination through the expansion of tourism and events into new urban spaces The book outlines how parts of London not previously regarded as tourist territory are now subject to the visitor gaze with tourism spreading beyond established central zones into peripheral suburban and residential areas in part propelled by a big rise in peer to peer accommodation use

Simultaneously London's airports and sports stadiums and their surrounds are becoming destinations in their own right. New vantage points have been created allowing tourists to explore the city from above at night time or through tours given by the homeless via the opening up of the River Thames or through the transformation of local parks into eventscapes. The book explores these trends and shows how urban destinations expand. In doing so it enhances our understanding of London and highlights the growing significance of tourism and events in global cities.

Global Cities Greg Clark, 2016-11-29 Why have some cities become great global urban centers and what cities will be future leaders. From Athens and Rome in ancient times to New York and Singapore today a handful of cities have stood out as centers of global economic military or political power. In the twenty first century the number of truly global cities is greater than ever before reflecting the globalization of both economic and political power. In *Global Cities A Short History* Greg Clark an internationally renowned British urbanist examines the enduring forces such as trade migration war and technology that have enabled some cities to emerge from the pack into global leadership. Much more than an historical review Clark's book looks to the future examining the trends that are transforming cities around the world as well as the new challenges all global cities increasingly will face. Which cities will be the global leaders of tomorrow. What are the common issues and opportunities they will face. What kinds of leadership can make these cities competitive and resilient. Clark offers answers to these and similar questions in a book that will be of interest to anyone who lives in or is affected by the world's great urban areas.

Global Political Cities Kent E. Calder, 2021-01-26 Why cities often cope better than nations with today's lightning fast changes. The British Empire declined decades ago but London remains one of the world's preeminent centers of finance commerce and political discourse. London is just one of the global cities assuming greater importance in the post cold war world even as many national governments struggle to meet the needs of their citizens. *Global Political Cities* shows how and why cities are re asserting their historic role at the forefront of international economic and political life. The book focuses on fifteen major cities across Europe Asia and the United States including New York London Tokyo Brussels Seoul Geneva and Hong Kong not to mention Beijing and Washington D C. In addition to highlighting the achievements of high profile mayors the book chronicles the growing influence of think tanks mass media and other global agenda setters in their local urban political settings. It also shows how these cities serve in the Internet age as the global stage for grassroots appeals and protests of international significance. *Global Political Cities* shows why cities cope much better than nations with many global problems and how their strengths can help transform both nations and the broader world in future. The book offers important insights for students of both international and comparative political economy diplomats and other government officials executives of businesses with global reach and general readers interested in how the world is changing around them.

The story of your city Greg Clark, Tim Moonen, Jake Nunley, 2018-10-31 By the end of this century 9 out of 10 Europeans will live in an urban area. But what kind of city will they call home. You'll find all the answers in *CITY TRANSFORMED* the new essay series from the

European Investment Bank This panoramic first essay in the series lays out a great sweeping history of European cities over the last fifty years and showcases new directions being taken by some of our most innovative cities Urban experts Greg Clark Tim Moonen and Jake Nunley based at University College London take a definitive look at how Europe's cities transformed from post industrial decline to thriving metropolises that are as prosperous and liveable as anywhere on Earth **The UK Regional-National Economic Problem** Philip McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government ***London: Mobility City*** Greg Clark,Tim Moonen,Jake Nunley,2018-11-16 Despite the uncertainties of Brexit London continues to be rated as a leading location in Europe and the world for business knowledge and talent But 30 years ago when London had no citywide government a transport system in crisis and no successful track record of continuous large scale upgrades to the urban fabric this scenario would have seemed highly unlikely In this essay we examine how London's unpromising 1980s gave rise to three decades of reinvestment and we explain how the European Investment Bank played an essential catalytic role in successive cycles of London's evolution from an under governed de populating national capital into a diverse global centre benefiting from integrated urban systems management **World Cities and Nation States** Greg Clark,Tim Moonen,2016-11-11 World Cities and Nation States takes a global perspective to show how national governments and states provinces regions continue to play a decisive and often positive partnership role with world cities The 16 chapter book comprised of two introductory chapters 12 central chapters that draw on case studies and two summary chapters draws on over 40 interviews with national ministers city government officials business leaders and expert academics **Contemporary European Science Fiction Cinemas** Aidan Power,2018-08-14 Contemporary

European Science Fiction Cinemas charts the evolution of European science fiction cinema in the 21st century a period in which Europe itself has faced myriad crises Key to this study is an exploration of how European science fiction responds to prevalent issues such as the financial crisis political extremism and violence large scale migration and indeed the potential breakup of the European Union itself What futures does science fiction cinema envision for Europe Is it capable of moving beyond dystopian visions of a continent beset by seemingly omnipresent turbulence Emphasising science fiction s unique ability to estrange exploit and reflect upon popular concerns this book directly engages with such questions accounting for ongoing mutations in the very nature of the European project as it does so The EIB in the city: Investment on the agenda Greg Clark,Tim Moonen,Jake Nunley,2019-11-04 City transformed has shown how Europe s cities have developed over the last 50 years The European Investment Bank has adapted alongside them building a greater more focused role in urban development that takes it into truly innovative areas Future cities need to face up to challenges in climate productivity knowledge social mobility and resilience Here s how the EU bank is setting up to be a partner on that path **Dawnlands** Philippa Gregory,2022-11-08 THE NEW SPELLBINDING NOVEL IN THE FAIRMILE SERIES FROM NUMBER ONE BESTSELLING AUTHOR OF TIDELANDS and DARK TIDES PHILIPPA GREGORY In a divided country power and loyalty conquer all Ned Ferryman inspired by news of a rebellion against the Stuart kings returns from America with his Pokanoket servant to join the uprising against roman catholic King James As Ned swears loyalty to the charismatic Duke of Monmouth he discovers a new and unexpected love Meanwhile Queen Mary summons her friend Livia to a terrified court Recklessly Livia drags her son Matthew and his foster mothers Alinor and Alys into a plot to save the queen from Monmouth s invasion and Matthew is rewarded with the Manor of Foulmire on the tidelands where Ned Alinor and Alys had once scraped a poor living Suddenly Alinor is lady of the manor as Ned marches into the last battle between the royalists and commoners hoping for a new dawn for freedom A compelling and powerful story of political intrigue and personal ambition set between the palaces of London the tidelands of Foulmire and the shores of Barbados Praise for Dawnlands This sprawling epic addition to the series will delight Gregory s many fans The Times Fast paced gripping and meticulously researched the latest novel from Philippa Gregory is historical fiction at its best Daily Express Spellbinding Woman s Own I love falling into a Philippa Gregory novel her vibrant take on historical events always brings past eras alive Adele Parks Platinum Magazine **London's Waterfront and its World, 1666-1800** John Schofield,Stephen Freeth,2023-12-21 This volume covering the period 1666 1800 considers the archaeology of the port of London on a wide scale from the City down the Thames to Deptford During this period with the waterfront at its centre London became the hub of the new British empire contributing to the exploitation of people from other lands known as slavery **The Politics of Community-making in New Urban India** Ritanjan Das,Nilotpall Kumar,2023-04-17 This book explores the relationship between the production of new urban spaces and illiberal community making in contemporary India It is based on an ethnographic study in Noida a city at the eastern fringe of the

state of Uttar Pradesh bordering national capital Delhi The book demonstrates a flexible planning approach being central to the entrepreneurial turn in India s post liberalisation urbanisation whereby a small scale industrial township is transformed into a real estate driven modern city Its real point of departure however is in the argument that this turn can enable a form of illiberal community making in new cities that are quite different from older metropolises Exclusivist forms of solidarity and symbolic boundary construction stemming from the differences across communities as well as their internal heterogeneities form the crux of this process which is examined in three distinct but often interspersed socio spatial forms planned middle class residential quarters urban villages and migrant squatter colonies The book combines radical geographical conceptualisations of social production of space and neoliberal urbanism with sociological and anthropological approaches to urban community making It will be of interest to researchers in development studies sociology urban studies as well as readers interested in society and politics of contemporary India South Asia
