Elemental Philosophy David Macauley, 2010-09-29 Bachelard called them the hormones of the imagination Hegel observed that through the four elements we have the elevation of sensuous ideas into thought Earth air fire and water are explored as both philosophical ideas and environmental issues associated with their classical and perennial conceptions David Macauley embarks upon a wide ranging discussion of their initial appearance in ancient Greek thought as mythic forces or scientific principles to their recent reemergence within contemporary continental philosophy as a means for understanding landscape and language poetry and

place the body and the body politic In so doing he shows the importance of elemental thinking for comprehending and responding to ecological problems In tracing changing views of the four elements through the history of ideas Macauley generates a new vocabulary for and a fresh vision of the environment while engaging the elemental world directly with reflections on their various manifestations

Romantic Sustainability Ben P. Robertson, 2015-12-24 Romantic Sustainability is a collection of sixteen essays that examine the British Romantic era in ecocritical terms Written by scholars from five continents this international collection addresses the works of traditional Romantic writers such as John Keats Percy Shelley William Wordsworth Lord Byron and Samuel Coleridge but also delves into ecocritical topics related to authors added to the canon more recently such as Elizabeth Inchbald and John Clare The essays examine geological formations clouds and landscapes as well as the posthuman and the monstrous The essays are grouped into rough categories that start with inspiration and the imagination before moving to the varied types of consumption associated with human interaction with the natural world Subsequent essays in the volume focus on environmental destruction monstrous creations and apocalypse The common theme is sustainability as each contributor examines Romantic ideas that intersect with ecocriticism and relates literary works to questions about race gender religion and identity

The Oxford Handbook of Media, Technology, and Organization Studies Timon Beyes, Robin Holt, Claus Pias, 2020 This Handbook explores the largely uncharted territory of media technology and organization studies and interrogates their foundational relations their forms and their consequences The chapters consider how specific mediating technological objects such as the Clock or the Smartphone help us to create organizational form

The Cloud Factory Ross Parsons, 2019-05-19 The Cloud Factory is a unique book blending memoir travelogue and reportage a book that is not written but borne out of the author's journey without itinerary to the New World Adapted from the Book of Clouds the author shares his passion for Latin American literature which ultimately led him to the shores of South America and the stories that illuminate the nature and uniqueness of Venezuela The Cloud Factory depicts the author's intimate emotions and small epiphanies that together offer an inspiring insight into what it means to embrace a new culture and language

John Ruskin, J.M.W. Turner and the Art of Water Carmen Casaliggi, 2022-12-20 This book assesses Ruskin's and Turner's mutual interest in the theme of water with particular reference to *The Harbours of England* 1856 Ruskin's book on ships and marine art to which are appended Turner's 12 illustrations of the English ports By considering existing scholarly works on Ruskin and Turner the book begins by demonstrating that the two despite their widely acknowledged relations have rarely been examined in conjunction It raises the question as to how the subject of water inspired the intellectual aesthetic philosophical and scientific climate of the nineteenth century both in Britain and abroad and acknowledges the significance of the relationship between Ruskin and Turner in the context of aquatic studies Ruskin's childhood fascination with water is examined in detail while the scientific and spiritual importance of the subject in *Modern Painters* and *The Stones of Venice* is also emphasised and read in parallel with *The Harbours of England* a detailed account of which is given referring to both text and illustrations Turner's role in Ruskin's understanding of specific water pictures is also reconstructed The book demonstrates that water is important as a multifaceted compendium of contemporary themes for tradition progress nationalism and patriotism find their iconography in its depiction Considering the literary and painterly implications of wateriness the text concludes with a reflection upon the significance of the study of water for Ruskin and Turner and for their

inspire Morrissey's mopes and Kurt Cobain's grunge Rain is also a travelogue taking readers to Scotland to tell the surprising story of the mackintosh raincoat and to India where villagers extract the scent of rain from the monsoon drenched earth and turn it into perfume Now after thousands of years spent praying for rain or worshiping it burning witches at the stake to stop rain or sacrificing small children to bring it mocking rain with irrigated agriculture and cities built in floodplains even trying to blast rain out of the sky with mortars meant for war humanity has finally managed to change the rain Only not in ways we intended As climate change upends rainfall patterns and unleashes increasingly severe storms and drought Barnett shows rain to be a unifying force in a fractured world Too much and not nearly enough rain is a conversation we share and this is a book for everyone who has ever experienced it

Exploring the Invisible Lynn Gamwell, 2002 This sumptuous and stunningly illustrated book shows through words and images how directly profoundly and indisputably modern science has transformed modern art Beginning in the mid nineteenth century a strange and exciting new world came into focus a world of microorganisms in myriad shapes and colors prehistoric fossils bizarre undersea creatures spectrums of light and sound molecules of water and atomic particles Exploring the Invisible reveals that the world beyond the naked eye made visible by advances in science has been a major inspiration for artists ever since influencing the subjects they choose as well as their techniques and modes of representation Lynn Gamwell traces the evolution of abstract art through several waves beginning with Romanticism She shows how new windows into telescopic and microscopic realms combined with the growing explanatory importance of mathematics and new definitions of beauty derived from science broadly and profoundly influenced Western art Art increasingly reflected our more complex understanding of reality through increasing abstraction For example a German physiologist's famous demonstration that color is not in the world but in the mind influenced Monet's revolutionary painting with light As the first wave of enthusiasm for science crested abstract art emerged in Brussels and Munich By 1914 it could be found from Moscow to Paris Throughout the book are beautiful images from both science and art some well known others rare that reveal the scientific sources mined by Impressionist and Symbolist painters Art Nouveau sculptors and architects Cubists and other nineteenth and twentieth century artists With a foreword by astronomer Neil deGrasse Tyson Exploring the Invisible appears in an age when both artists and scientists are exploring the deepest meanings of life consciousness and the universe

Literature and Science, 1660-1834, Part I. Volume 3 Judith Hawley, 2024-10-28 This volume reproduces primary texts which embody the polymathic nature of the literature of science and provides editorial overviews and extensive references to provide a resource for specialized academics and researchers with a broad cultural interest in the long 18th century

Climate Change Brian C. Black, David M. Hassenzahl Ph.D., Jennie C. Stephens, Gary J. Weisel, Nancy Gift, 2013-01-08 This book provides a holistic consideration of climate change that goes beyond pure science fleshing out the discussion by considering cultural historical and policy driven aspects of this important issue Climate change is a controversial topic that promises to reframe rudimentary ideas about our world and how we will

live in it The articles in *Climate Change An Encyclopedia of Science and History* are designed to inform readers decision making through the insight of scholars from around the world each of whom brings a unique approach to this topic The work goes beyond pure science to consider other important factors weighing the cultural historical and policy driven contributors to this issue In addition the book explores the ideas that have converged and evolved in order to clarify our current predicament By considering climate change in this holistic fashion this reference collection will prepare readers to consider the issue from every angle Each article in the work is suitable for general readers particularly students in high school and college and is intended to inform and educate anyone about climate change providing valuable information regarding the stages of mitigation and adaptation that are occurring all around us *Air's Appearance* Jayne Elizabeth Lewis, 2024-05-31

In *Air's Appearance* Jayne Elizabeth Lewis enlists her readers in pursuit of the elusive concept of atmosphere in literary works She shows how diverse conceptions of air in the eighteenth century converged in British fiction producing the modern literary sense of atmosphere and moving novelists to explore the threshold between material and immaterial worlds *Air's Appearance* links the emergence of literary atmosphere to changing ideas about air and the earth's atmosphere in natural philosophy as well as to the era's theories of the supernatural and fascination with social manners or as they are now known airs Lewis thus offers a striking new interpretation of several standard features of the Enlightenment the scientific revolution the decline of magic character based sociability and the rise of the novel that considers them in terms of the romance of air that permeates and connects them As it explores key episodes in the history of natural philosophy and in major literary works like *Paradise Lost* *The Rape of the Lock* *Robinson Crusoe* and *The Mysteries of Udolpho* this book promises to change the atmosphere of eighteenth century studies and the history of the novel
