[Nutrition Standards and Meal Requirements for National School Lunch and Breakfast Programs](#) Institute of Medicine, Food and Nutrition Board, Committee on Nutrition Standards for National School Lunch and Breakfast Programs, 2009-01-15 The National School Breakfast Program feeds 10 million children each day and the National School Lunch Program feeds more than 30 million students Yet the national nutrition standards and meal requirements for these meals were created more than a decade ago making them out of step with recent guidance about children's diets With so many children receiving as much as 50 percent of their daily caloric intake from school meals it is vital for schools to provide nutritious food alongside the best possible education for the success of their students At the request of U S Department of Agriculture USDA the Institute of Medicine assembled a committee to recommend updates and revisions to the school lunch and breakfast programs The first part of the committee's work is reflected in the December 2008 IOM report Nutrition Standards and Meal Requirements for National School Lunch and Breakfast Programs Phase I Proposed Approach for Recommending Revisions Phase II of the report is expected in Fall 2009 This first report provides information about the committee's approach as it reviews the school lunch and breakfast programs In the report's second part the committee will share its findings and recommendations to bring these meals more in line with today's dietary guidelines The committee welcomes public comments about its intended approach An open forum will be held January 28 2009 in Washington DC to receive input from the public Please go to <http://www.iom.edu/fnb/schoolmeals> for details or email FNBSchoolMeals@nas.edu with any input

[Front-of-Package Nutrition Rating Systems and Symbols](#) Institute of Medicine, Food and Nutrition Board, Committee on Examination of Front-of-Package Nutrition Rating Systems and Symbols, 2010-12-21 The federal government requires that most packaged foods carry a standardized label the Nutrition Facts panel that provides nutrition information intended to help consumers make healthful choices In recent years manufacturers have begun to include additional nutrition messages on their food packages These messages are commonly referred to as front of package FOP labeling As FOP labeling has multiplied it has become easy for consumers to be confused about critical nutrition information In considering how FOP labeling should be used as a nutrition education tool in the future Congress directed the Centers for Disease Control and Prevention to undertake a two phase study with the IOM on FOP

nutrition rating systems and nutrition related symbols The Food and Drug Administration is also a sponsor In Phase 1 of its study the IOM reviewed current systems and examined the strength and limitations of the nutrition criteria that underlie them The IOM concludes that it would be useful for FOP labeling to display calorie information and serving sizes in familiar household measures In addition as FOP systems may have the greatest benefit if the nutrients displayed are limited to those most closely related to prominent health conditions FOP labeling should provide information on saturated fats trans fats and sodium
