Selected Essays of Wilson Harris A.J.M. Bundy, 2005-08-04 First published in 1999 Routledge is an imprint of Taylor Francis an informa company *Samuel Beckett and the Arts* Davide Crosara, Mario Martino, 2024-06-11 Beckett's dialogue with the arts music painting digital media has found a growing critical attention from seminal comprehensive studies Oppenheim 2000 Harvey 1967 to name just two to more recent contributions Gontarski ed 2014 Lloyd 2018 Research has progressively moved from a general inquiry on Beckett beyond the strictly literary to issues related to intermediality and embodiment Maude 2009 Tajiri 2007 post humanism and technology Boulter 2019 Kirushina Adar Nixon eds 2021 intersections with popular culture Pattie and Stewart eds 2019 However a specific analysis on Beckett's relationship with Italian arts and poetry on one side and on Italian artists response to Beckett's oeuvre on the other is still missing The volume offers an original examination of Beckett's presence on the contemporary Italian cultural scene a stage where he became and still is the fulcrum of some of the most significant experimentations across different genres and media The reader will look at him as an Italian artist in constant dialogue with the most significant modern European cultural turns The Art and Architecture of Academic Writing Patricia Prinz, Birna Arnbjörnsdóttir, 2021-08-15 This book is a bridge to confident academic writing for advanced non native English users It emphasizes depth over breadth through mastery of core writing competencies and strategies which apply to most academic disciplines and genres Tailored to students in EMI programs the content was piloted and revised during a longitudinal writing study The innovative approach prepares students to write for the academic community through the dual lenses of Art developing a writer's voice through choices in language style and topics and Architecture mastering norms of academic language genre and organization The user friendly text maximizes time for writing practice and production by avoiding lengthy readings Part 1 builds skills and confidence in writing by focusing on assignments that do not require research Part 2 applies newly mastered principles skills and strategies to research based writing Students learn to incorporate thesis research and evidence into a process for academic writing by following the AWARE framework Arranging to write Writing Assessing Revising and Editing **T. S. Eliot and Organicism** Jeremy Diaper, 2018-12-12 This book reads T S Eliot's poetry and plays in light of his sustained preoccupation with organicism It demonstrates that Eliot's environmental concerns emerged as a notable theme in his literary works from his early poetry notebook of poems known as Inventions of the March Hare at least until Murder in the Cathedral **Soil Conservation**, 1967-08 Century Readings in the English Essay Louis Wann, 1926 **Sea of Grass** Dave Hage, Josephine Marcotty, 2025-05-27 A vivid portrait of the American prairie which rivals the rainforest in its biological diversity and with little notice is disappearing even faster This book describes in loving living prose one of the world's greatest and most important landscapes And it does so while there's still time to save some serious part of it Bill McKibben author of The End of Nature The North American prairie is an ecological marvel a lush carpet of grass that stretches to the horizon and home to

some of the nation's most iconic creatures bison elk wolves pronghorn prairie dogs and bald eagles Plants microbes and animals together made the grasslands one of the richest ecosystems on Earth and a massive carbon sink but the constant expansion of agriculture threatens what remains When European settlers encountered the prairie nearly two hundred years ago rather than a natural wonder they saw an alien and forbidding place But with the steel plow artificial drainage and fertilizers they converted the prairie into some of the world's most productive farmland a transformation unprecedented in human history American farmers fed the industrial revolution and made North America a global breadbasket but at a terrible cost the forced dislocation of Indigenous peoples pollution of great rivers and catastrophic loss of wildlife Today industrial agriculture continues its assault on the prairie plowing up one million acres of grassland a year Farmers can protect this extraordinary landscape but trying new ideas can mean ruin in a business with razor thin margins and will require help from Washington D C and from consumers Veteran journalists and midwesterners Dave Hage and Josephine Marcotty reveal humanity's relationship with this incredible land offering a deep compassionate analysis of the difficult decisions as well as opportunities facing agricultural and Indigenous communities *Sea of Grass* is a vivid portrait of a miraculous ecosystem that makes clear why the future of this region is of essential concern far beyond the heartland *Inside Education* Stephen O'Brien, 2015-12-22 To learn more about learning what it is and how it works it is necessary to look inside education *Inside Education* takes the reader on a journey of four live education projects the first all Irish speaking mixed gendered multi faith primary school in the Republic of Ireland ideally suited to exploring learning identity an alternative post primary school for those who leave or are left behind by the formal education system also based in the Republic of Ireland and ideally suited to exploring personal learning an early college school that enables students to simultaneously sit their high school diploma and college exams based in Queens New York and ideally suited to exploring learning success and an adult education training centre that works with landless movement members based in Brazil and ideally suited to exploring learning power Using a critical ethnography approach each research narrative naturally unfolds enfold to tell a more complete learning story All those interested in education are primed readers By re-viewing their own learning outlook they may begin to advance deeper critical ideas and debates in education They may come to re-represent education reminding public consciousness of its human stories as well as its curious intricate and powerful qualities And they may re-discover other roads to raise a scholar Teachers educational researchers parents and guardians will be particularly interested readers *Inside Education* is a thought provoking challenging and revealing journey inside the world of education and learning Its exploration of school and classroom practices in a range of different settings provides important insights into how we learn a central aspect of our education system which remains overlooked and understudied In doing so it lays down a challenge to policy makers and educators everywhere to think differently about the way we learn and ultimately help students fulfil their real potential Carl O'Brien Chief Reporter for The Irish Times *Inside Education* is a stunning example of passionate scholarship that nonetheless

refuses a redemptionist stance The ethnography captures people and contexts and draws the reader into the four sites of learning in fluent and lyrical prose This is facilitated by the extensive use of research notes deploying historical comparative literary artistic and scholarly sources Denis O Sullivan Emeritus Professor of Education University College Cork Ireland

The Living Earth ,1989 **The Western Farmer and Gardener** ,1841 *Beauvoir and Western Thought from Plato to Butler* Shannon M. Mussett,William S. Wilkerson,2012-12-01 Essays on Beauvoirs influences contemporary engagements and legacy in the philosophical tradition Despite a deep familiarity with the philosophical tradition and despite the groundbreaking influence of her own work Simone de Beauvoir never embraced the idea of herself as a philosopher Her legacy is similarly complicated She is acclaimed as a revolutionary thinker on issues of gender age and oppression but although much has been written weighing the influence she and Jean Paul Sartre had on one another the extent and sophistication of her engagement with the Western tradition broadly goes mostly unnoticed This volume turns the spotlight on exactly that examining Beauvoirs dialogue with her influences and contemporaries as well as her impact on later thinkersconcluding with an autobiographical essay by bell hooks discussing the influence of Beauvoirs philosophy and life on her own work and career These innovative essays both broaden our understanding of Beauvoir and suggest new ways of understanding canonical figures through the lens of her work Liberating People, Planet, and Religion Joerg Rieger,Terra Rowe,2024-05-29 There is growing consensus that life on the planet is in peril if climate change continues at its current pace At stake is not only the future of many species but of humanity itself As an increasing number of ecological economists have emphasized these problems will only be adequately addressed by re examining economic systems from an ecological perspective fundamentally calling into question assumptions of unlimited growth and the maximization of shareholder profit foundational to neoliberal capitalism Religion and ecology scholars have also increasingly emphasized the ways climate change challenges assumed divides between nature and culture religion and labor economy and ecology and calls for critical and constructive engagement with the religion economy and ecology nexus Often though religious engagements with economy and ecology have placed emphasis on individual morality action and agency at the level of consumption patterns or have suggested mere modifications within existing economic paradigms Contributors to this volume call into question the adequacy of this approach in light of the urgency of climate change which is always ever entwined with ongoing patterns of exploitation oppression and colonialism in current economic systems Rather than tweaking a system of exploitation for instance by emphasizing individual consumption or care for human and non human victims these authors articulate important opportunities for religious engagement activism resistance and solidarity around issues of production and labor Recalling that Marx linked agencies and labor of people as well as the other than human world these authors aim to articulate a sense in which liberation of people and the planet are intertwined and can be accomplished only through collaboration for their common good The basic intuition driving this volume is that while Christianity has by and large become the handmaiden of

exploitative capitalism and empire it might also reclaim latent theologies and religious practices that call into question the fundamental valuation of labor without recognition or rest of extractive exploitation and a winner take all praxis In the process Christianity might reclaim and reinvest in tenuous historical materializations of transformed ecological and economic relationships while economics might be re informed by a valuation of the shared oikos as well as a just accounting of and renumeration for labor Together they might serve the aim of the flourishing of all people and the planet **The Living Soil**
