Myth-Building in Modern Media A.J. Black, 2020-06-18 Mythology for centuries has served as humanity's window into understanding its distant past. In our modern world, storytelling creates its own myths and legends in media ranging from the world of television and cinema to literature and comic books that help us make sense of the world we live in today. What is the Mytharc? How did it arise? How does it inform modern long-form storytelling? How does the classical hero's journey intersect with modern myths and narratives? And where might the storytelling of tomorrow take readers and viewers as we imagine our future? From *The X-Files* to H.P. Lovecraft, from *Lost* to the Marvel cinematic universe and many worlds beyond, this study explores our modern storytelling mythology and where it may lead us. *Long Night's Loving* Anne Mather, 2015-08-17 He could still make her want him. Maggie would never have made the journey to Northumberland to see her ex-husband if it hadn't been for their rebellious teenage daughter. Lindsey had formed a disastrous relationship, and Neil was the only person who could help. Clearly, Maggie's treacherous betrayal some years ago still rankled with Neil, because why else would he so provoke and humiliate her? She was ashamed of the fact that he could still make her want him while seemingly remaining detached himself. Surely, he must be involved enough to want to help Lindsey, even if he suspected she might be another man's child. **Science and the Bible** Henry Morris, 1986-09-08 Study scientific data and biblical truths in five chapters: Science in the Bible, The Theory of Evolution, Science and the Flood, The Bible and Ancient History, and Fulfilled Prophecy. **Neuroendocrinology of Reproduction** Norman Adler, 2012-12-06 The subject of this book is neuroendocrinology, that branch of biological science devoted to the interactions between the two major integrative organ systems of animals: the endocrine and nervous systems. Although this science today reflects a fusion of endocrinology and neurobiology, this synthetic approach is relatively recent. At the beginning of the 20th century, when the British physiologists Bayliss and Starling first proposed endocrinology to be an independent field of inquiry, they went to great lengths to establish the autonomy of chemical secretions in general and their independence from nervous control in particular. Bayliss W.M. and Starling E.H. 1902. The mechanism of pancreatic secretion. *Physiol* 28:325. They argued with Pavlov, who said that there was a strong influence of the nervous system on the gastrointestinal phenomena the endocrinologists were studying. For several decades, the English physiologists prevailed at least in the West, and Pavlov's critique was not taken to heart by the practitioners of the newly emerging discipline of

endocrinology Through the work of Harris the Scharrers Sawyer Everett and others there has been something of a scientific detente in the latter half of this century the hybrid field of neuroendocrinology is now regarded as one of the corner stones of modern neural science and is of fundamental importance in basic and clinical endocrinology
