plantation projects of Raleigh and ended with Drake bringing home the discouraged settlers of the first Virginia colony. Although not a financial success the expedition attracted wide attention in England and the continent and was a prelude to the events of 1588. For over three centuries after the voyage the main source of information about it was the lively narrative strongly propagandistic in tone that was published in 1588 and 1589. In the present volume this account attributed to Captain Walter Bigges has been critically edited in the light of evidence now available from English and Spanish sources. Printed also are documents relating to ships and personnel and to financial accounts of the expedition. Included too are the journal from the vice admiral's ship the *Primrose* edited from the original manuscript, the fragmentary journals from ships of two other major officers and an important newsletter. Among illustrations are a previously unpublished map relating to Drake's stop at Vigo as well as the Boazio maps which are shown in differing sizes and details. Dr Keeler's introduction discusses the expedition in the context of Elizabethan policies in the pre Armada years. She points out new evidence on Drake's administrative practices on his negotiations with Spanish officials and on his dealings with a troublesome rear admiral. Appendices provide critical notes on the Boazio maps and on the circumstances of the publication of the Bigges account. This is a new print on demand hardback edition of the volume first published in 1981. *Peter Stent, London Printseller*

Alexander V. Globe, 2011-11-01. From the 15th century on engravings influenced European culture almost as profoundly as books. Like stained glass windows in the Middle Ages or television today, popular prints were designed to reach even the lowest orders of society. In the 17th century Peter Stent, whose shop stood outside Newgate, was England's most prolific seller of popular prints, maps and copybooks to the working and rising middle classes. His inventory of copper plates reflected the shifts of popular tastes during this period and commented directly on the turbulent events of the day. In documenting Stent's output, Alexander Globe studied the printsellers' advertising catalogues as external controls for reconstructing inventories as well as indices to contemporary tastes. From these and other contemporary sources, Globe cites every engraving and book attributable to Stent, breaking down the material into types: portraits, maps, miscellaneous sheets and books, including works on handwriting, politics, natural history, anatomy, costume and architecture. References and additions are made to the catalogues of Donald Wing and A. M. Hind. Globe takes the history of engraving beyond Hind by including prints from the Commonwealth, Protectorate and early Restoration periods. Eight appendices supplement the catalogue information. They provide evidence for print identification, discuss paper sizes and list Stent's artists, suppliers and business associates. All the collections in which Stent items may be found are named. The volume concludes with a bibliography and indices of subject as well as post-17th century authors. Globe's introduction to Stent's work is concerned with the social, political and economic conditions leading to the emergence of a popular printseller who catered to a different clientele from that usually studied by art historians. Stent's career illustrates the mid-17th century commercial revolution which saw the artisan's customers change from the wealthy leisure class to the worker who wanted mass-produced cheap goods. Drawing on material in a

hundred libraries and museums around the world the catalogue describes over fifteen hundred engravings including 319 sheets and five books of portraits 42 maps 102 miscellaneous prints and sets with religious classical heraldic and satirical subjects and 86 books on handwriting politics military training natural history figure sketches costume architecture and ornament Richly illustrated with 319 plates Peter Stent will prove valuable not only to print dealers art historians museums and libraries but also to social cultural and political historians
