Policing Iraq Jesse Wozniak, 2021-03-09 *Policing Iraq* chronicles the efforts of the Kurdistan Regional Government of Iraq to rebuild their police force and criminal justice system in the wake of the US invasion Jesse S G Wozniak conducted ethnographic research during multiple stays in Iraqi Kurdistan observing such signpost moments as the Arab Spring the official withdrawal of coalition forces the rise of the Islamic State and the return of US forces By investigating the day to day reality of reconstructing a police force during active hostilities Wozniak demonstrates how police are integral to the modern state s ability to effectively rule and how the failure to recognize this directly contributed to the destabilization of Iraq and the rise of the Islamic State The reconstruction process ignored established practices and scientific knowledge instead opting to create a facade of legitimacy masking a police force characterized by low pay poor recruits and a training regimen wholly unsuited to a constitutional democracy Ultimately Wozniak argues the United States never intended to build a democratic state but rather to develop a dependent client to serve its neoimperial interests

Armed non-state actors and the politics of recognition Anna Geis, Maéva Clément, Hanna Pfeifer, 2021-06-15 Recognition is often considered a means to de escalate conflicts and promote peaceful social interactions This volume explores the forms that social recognition and its withholding may take in asymmetric armed conflicts examining the risks and opportunities that arise when local state and transnational actors recognise misrecognise or deny recognition of armed non state actors By studying key asymmetric conflicts through

the prism of recognition it offers an innovative perspective on the interactions between armed non state actors and state actors In what contexts does granting recognition to armed non state actors foster conflict transformation What happens when governments withhold recognition or label armed non state actors in ways they perceive as misrecognition The authors examine the ambivalence of recognition processes in violent conflicts and their sometimes unintended consequences The volume shows that while non recognition prevents conflict transformation the recognition of armed non state actors may produce counterproductive precedents and new modes of exclusion in intra state and transnational politics

Towards an Independent Kurdistan: Self-Determination in International Law Loqman Radpey, 2023-12-05

Kurdistan is among the world's most notorious cases of self-determination denied, and the reasons why this outcome remains unachieved reveal as much about the biases of international law as they do about the merits of the case for Kurdistan. On the centenary of the Treaty of Lausanne (24 July 1923), the last of the international instruments establishing the new international order after World War I, this book explores the potential blind spots of international law regarding its differential application in the Middle East. Tracing self-determination over the past century, the work explores how the law applies to Kurdish aspirations and to what extent the Kurds can rely upon the current law of self-determination to achieve internationally recognised statehood. The book offers an exhaustive historico-legal analysis of changing international legal concepts and geopolitical upheaval, providing a blueprint for Kurdish self-determination in international law. Shedding light on the law's structural biases, it represents a comprehensive historico-legal account of Kurdish aspirations for territorial independence within international law literature, offering a guide to relevant legal problems. It will be of interest to students and academics focused on international law, specifically peoplehood, statehood, secession, human rights, law, political science, and anthropology. Moreover, policymakers, government officials working in peace and conflict research and advocacy, institutes, think tanks, as well as scholars of international relations, historians, political scientists, regional specialists, diplomats, and non-governmental organisation activists will find it a useful reference. The book also illuminates the human rights status of the Kurds in their host states, making it relevant to scholars and activists. Its findings have implications extending beyond Kurdistan to self-determination struggles in Scotland, Catalonia, Ukraine, and elsewhere.

Diaspora as Cultures of Cooperation David Carment, Ariane Sadjed, 2017-01-20

This book examines the dynamic processes by which communities establish distinct notions of home and belonging. Focusing on the agency of diasporic groups rather than forced or voluntary dispersion and a continued longing for the country of origin, it analyses how a diaspora's presence impacts relations between home and host countries. Its central concern is the specific role that diasporas play in global cooperation, including cases without a successful outcome. Bridging the divide between diaspora studies and international relations, it will appeal to sociologists, scholars of migration, anthropologists, and policy makers.
