Animal Models for Nutrition Research, 1984. Abstract. This publication contains 18 papers presented at the Fifth Ross Conference on Medical Research. International nutrition experts were assembled to discuss methods for studying nutrition related diseases and conditions especially diabetes and trauma. The participants have been involved in various aspects of animal research as it relates to human research with nutrition as their common interest. The first objective of the conference was to provide information on appropriate choices of animal models for the study of human nutrition. The second objective was to demonstrate to health care professionals the value of animal research and the aspects that must be considered when interpreting the results of nutrition studies.
