

Lost on the Trail

Story By: Judie Eberhardt

Scott was so excited to be going on the summer day camp trip to the woods. His group was going to fish, float on a raft, and spend two nights sleeping in a tent. All the things boys his age love to do and no little sister to bother him.

After arriving at camp, some of the boys wanted to go with Mr. Allen fishing, and some of the boys went on a raft with Mr. Willard. Scott said he was going fishing. "All of you that are going fishing stay with me," said Mr. Allen. Tony, Joey, Mike, and Scott were the ones that chose fishing. Larry, Eddie, and Jason wanted to go on the raft. They left with Mr. Willard. The boys gathered up their fishing poles and baskets to hold the fish they were sure they were going to catch. They started down the trail toward the lake. Lake Amber was about a half mile down the trail. The boys arrived at the lake quickly; however when they got there, Scott was not with them. "Where's Scott?" Mr. Allen asked the other boys. "He was right behind me," said Tony. "We did move ahead for a little while," said Joey. Mr. Allen became very worried and started shouting, "Scott, Scott!" No answer. Scott suddenly found himself lost on the trail leading to Lake Amber. *I only looked away for a minute*, he thought to himself. *How could I be lost?* Scott decided to turn around and go back the way he came. He remembered the direction to the lake was south. He also remembered he had his compass from his last Boy Scout trip in his pocket. He took out his compass and realized he had been going north. Scott started down the trail in the opposite direction. As he did, he yelled, "Mr. Allen, Joey, Mike." Mike thought he heard someone yelling his name and tried to listen closely. Mr. Allen heard it too. Everyone stayed together and headed to where they heard the voice calling to them. All of a sudden, Scott jumped out from behind a tree and said, "I am so glad to see you guys!" "What happened?" asked the boys and Mr. Allen. "I was looking at the trees." "I must have made a wrong turn," said Scott. "When I realized what happened, you were gone." "Well, we're here now," said Mr. Allen. "Let's make sure we stay together." "Okay," the boys said and headed back to the lake to catch some fish for dinner.

Verbal Protocols of Reading Michael Pressley, Peter Afflerbach, 2012-12-06 Researchers from a variety of disciplines have collected verbal protocols of reading as a window on conscious reading processes Because such work has occurred in different disciplines many who have conducted verbal protocol analyses have been unaware of the research of others This volume brings together the existing literature from the various fields in which verbal protocols of reading have been generated In so doing the authors provide an organized catalog of all conscious verbal processes reported in studies to date the most complete analysis of conscious reading now available in the literature When the results of all of the studies are considered there is clear support for a number of models of reading comprehension including reader response theories schema perspectives executive processing models and bottom up approaches such as the one proposed by van Dijk and Kintsch The summary of results also demonstrates that none of the existing models goes far enough Thus a new framework constructively responsive reading is described This new model encompasses reader response schematic and executive processing and induction from word and phrase level comprehension to higher order meaning The important concept in this new model is that readers respond to bits and pieces of text as they are encountered all as part of the overarching goal of constructing meaning from text This volume also includes a critical review of the thinking aloud methodology as it has been used thus far This examination suggests that it continues to be an immature methodology and that much work is needed if a complete theory of conscious processing during reading is to be developed via verbal protocol analysis Finally after reviewing what has been accomplished to date the authors provide extensive discussion of the work that remains to be done and the adequacy of the verbal protocol methodology for permitting telling conclusions about text processing
