

The Clean Park

Tyler asked his mom if he could ride his bike to the park. "As long as you wear your helmet when you are riding," she said.

When Tyler got to the park it was filled with people holding garbage bags. A lot of his friends were there and so were some of his teachers. His friend Bella said, "Everyone is pitching in and cleaning the park today." She asked Tyler if he would help. Tyler said, "Sure," and asked for a garbage bag.

There was garbage everywhere. Tyler picked up candy wrappers, juice pouches, newspapers and apple cores. It was really gross. After an hour, he had filled three garbage bags. His friends filled a lot of garbage bags too.

Molthan-Hill,Heather Luna,Tony Wall,Helen Puntha,Denise Baden,2020-03-25 To be a storyteller is an incredible position from which to influence hearts and minds and each one of us has the capacity to utilise storytelling for a sustainable future This book offers unique and powerful insights into how stories and storytelling can be utilised within higher education to support sustainability literacy Stories can shape our perspective of the world around us and how we interact with it and this is where storytelling becomes a useful tool for facilitating understanding of sustainability concepts which tend to be complex and multifaceted The craft of storytelling is as old as time and has influenced human experience throughout the ages The conscious use of storytelling in higher education is likewise not new although less prevalent in certain academic disciplines what this book offers is the opportunity to delve into the concept of storytelling as an educational tool regardless of and beyond the boundaries of subject area Written by academics and storytellers the book is based on the authors own experiences of using stories within teaching from a story of the Ecology of Law to the exploration of sustainability in accounting and finance via contemporary cinema Practical advice in each chapter ensures that ideas may be put into practice with ease In addition to examples from the classroom the book also explores wider uses of storytelling for communication and sense making and ways of assessing student storytelling work It also offers fascinating research insights for example in addressing the question of whether positive utopian stories relating to climate change will have a stronger impact on changing the behaviour of readers than will dystopian stories Everyone working as an educator should find some inspiration here for their own practice on using storytelling and stories to co design positive futures together with our students
