

A Rare Find

Maria and Todd discovered an old vinyl record while rummaging through a cabinet in the attic. “Thelma Louise Hopkins!” Maria cried. “I read about her in a magazine. This could be worth millions!” As it turned out, it was not worth quite that much, but it was an extremely rare recording, one of the few original Thelma Louise Hopkins recordings left.

Mr. Sanchez, an executive at an auction company, told the two that it could be worth thousands, so they should consider selling it. Todd was amenable, but Maria was not convinced, not until she found out more information about Thelma Louise Hopkins. At the library they listened to tapes of her songs, saw photographs of her that were decades old, and looked over a biography about the singer’s life and music. They also found an article on the Internet about what Thelma Louise had been doing recently. She was still employed occasionally as a performer because she needed the money. Although Thelma originally had been compensated well, she never owned the copyrights of her songs, which meant that while other people still profited from her original recordings, she never saw a penny of the tremendous wealth they made.

“That’s not fair!” Todd cried.

A few minutes later, Maria called Mr. Sanchez “We still want to auction off the record,” she told him, “but we want the proceeds to go to Thelma Louise Hopkins. Can you help us do that?”

“I sure can,” said Mr. Sanchez. Then he added, “You two are doing a commendable thing.”

Bilingual Competence and Bilingual Proficiency in Child Development Norbert Francis, 2011-11-18 A study of first and second language development in an indigenous community with implications for broader linguistic and cognitive issues When two or more languages are part of a child's world we are presented with a rich opportunity to learn

something about language in general and about how the mind works In this book Norbert Francis examines the development of bilingual proficiency and the different kinds of competence that come together in making up its component parts In particular he explores problems of language ability when children use two languages for tasks related to schooling especially in learning how to read and write He considers both broader research issues and findings from an ongoing investigation of child bilingualism in an indigenous language speaking community in Mexico This special sociolinguistic context allows for a unique perspective on some of the central themes of bilingualism research today including the distinction between competence and proficiency modularity and the Poverty of Stimulus problem Francis proposes that competence knowledge should be considered as an integral component of proficiency ability rather than something separate and apart arguing that this approach allows for a more inclusive assessment of research findings from diverse fields of study The bilingual indigenous language project illustrates how the concepts of modularity and the competence proficiency distinction in particular might be applied to problems of language learning and literacy Few investigations of indigenous language and culture approach bilingual research problems from a cognitive science perspective By suggesting connections to broader cognitive and linguistic issues Francis points the way to further research along these lines
