Green Finance, Sustainable Development and the

Belt and Road Initiative Fanny M. Cheung,Ying-yi Hong,2020-12-21 Can China s Belt and Road Initiative BRI promote sustainable development alongside its primary aims of increasing commercial connectivity with China s partners In discussions of the BRI the focus has tended to be on the implications for infrastructure construction connectivity and economic diplomacy Rather less attention has been paid to its potential impact on sustainability The initiative has not only

set principles to prevent climate change and promote sustainable development but also pledged to align with the UN's environmental objectives. The contributors to this volume describe and evaluate the consequent policy coordination in the areas of green finance, green energy and sustainable development in the Belt and Road regions. They examine both the challenges and opportunities of these projects and the role that Hong Kong can play in supporting their assessment, finance and implementation. With contributions from authors based in mainland China, Hong Kong, Australia, Qatar, the UK and the US with experience in corporate social responsibility, international finance, environmental policy and international relations, this book presents a thorough and rigorous analysis of the green side of the BRI, a valuable resource for scholars of the BRI and its many implications for China, its partners and the development of sustainable infrastructure.

Global Classroom Jeffrey S. Lantis, 2015-11-17. Travel abroad has become a standard feature of global citizenship and many seek help in making sure their travel experiences are fulfilling. University-based tours and travel programs are among the most popular for the educated sojourner. This book is aimed at students, professors and study abroad professionals but anyone who wants help in preparing for informed and culturally sensitive travel will benefit from its extensive resources. Both a primer for a holistic experience abroad and a practical guide to issues that arise in any travel setting, *The Global Classroom* is an essential travel companion. It explores the philosophy behind overseas travel, the potential value of the experience, practical preparation for study abroad, selecting the right program, actively engaging in foreign educational settings, reorientation challenges and exploring pathways for integrating the experience into careers as engaged global citizens. The guide concludes with an appendix containing valuable resources for easy use by all.

The Economics of Health Professional Education and Careers Barbara McPake, Allison Squires, Mahat Agya, Edson Araujo, 2015-10-01. The formation of health professionals is critical for the health system to function and to achieve its universal health coverage (UHC) goals and this is well recognized by the majority of governments that plan to ensure enough training places and aim to regulate in order to ensure quality. But the importance of market forces is often overlooked, resulting in interventions and regulations that often fail to achieve their intended effects. This publication aims to inform the design of health professionals' education policies to better manage health labor market forces toward UHC. It documents what is known about the influence of market forces on the health professional formation process. The report sought to answer the following questions: What have

been the large global and regional trends in the development of health professions How have these trends affected the career decisions of current and potential health professionals What is the evidence base on the value and effectiveness of health professional education of different types How has the market for health professional education evolved and with what interrelationships with the health labor and health care markets The contexts of the market for health professional training have been subject to important changes in recent decades in particular the growing extent of employment of mid level cadres of health professionals changes in technology and the associated growth of high skilled occupations the increasing interconnectedness of national health systems through globalization with its implications for international health professional mobility and the greater complexity of the public private mix in employment options There is a need to ensure that market forces align with the intentions of planning and regulation and the needs of UHC goals This publication provides

recommendations to support the design of policies that help to achieve these **The Complete Book of Colleges 2021**
