

Hyperbole

Your brother is like
Ten feet tall;
He stands so tall
That he could probably reach
The Eiffel Tower without even trying.
It's like he's Paul Bunyan
Or something like that.

The Lever of Riches Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics

technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

The centuries between 1100 and 1500 were the crucible in which English language and literature after the blow of the Norman Conquest were reformed with results that affected all later times The national language and literary culture were reconstructed influences The medieval centuries present a fascinating success story of recovery inventiveness and major achievement in all aspects of national life In literature lyric verse narrative poetry drama and discursive prose were all established in characteristic modes In the present book many works are discussed while such masterpieces as the works of Chaucer Langland's *Piers Plowman* the poems of the Gawain poet and Malory's *Morte Darthur* are shown as the secular equivalent in words of the great medieval Gothic cathedrals The forms of this varied body of literature had as characteristic a period style as contemporary Gothic art and architecture themselves English literature may equally be described as Gothic with assumptions and achievements which both lead to and contrast with later Neoclassical styles Black and white photographic illustrations further the comparison and suggest some background English Gothic literature derives from many interrelated social context court town monastery and countryside It was recorded in manuscripts that blend the qualities of popular speech and folktale with some of the more impersonal regular qualities of printing that last of fundamental medieval inventions In this new concept of the history of medieval literature Derek Brewer illuminates the major literary works with detailed exposition to make them available to the reader coming fresh to them At the same time he places them in the context of developing literacy and individualism secular realism romantic love personal religion etc setting forth a coherent framework of cultural history which will challenge the interest of those who already know the period

Anecdotes and Antidotes Ibn Abi Usaybi'ah, 2020-06-25 To my knowledge no one has ever written a comprehensive book dealing with physicians through the ages and recounting their history in a coherent fashion So wrote Syrian physician Ibn Abi Usaybi'ah circa 1243 as he embarked on the first world history of medicine ever attempted Many physicians served at the royal courts of their time and were firmly part of the intellectual and cultural scene where the ability to write stylishly and entertain one's peers in both prose and verse was the basis of social credibility The work Ibn Abi Usaybi'ah created contains over 432 biographical accounts of physicians from those of ancient Greece such as Galen through Avicenna and Maimonides to the author's own colleagues of the 13th century As such his work includes important accounts of medical activity in medieval

hospitals Through this book a window opens not only on to the origins of the medical profession but also into the truly multi cultural multi religious world of the medieval Middle East Anecdotes and Antidotes is an abridged version of this world history of medicine It comprises 103 biographies of physicians and philosophers organized geographically and chronologically from the 4th century BC to the 13th century and includes seminal Muslim Christian and Jewish figures It contains vital medical and historical information as well as revealing the cultural values interests and concerns of the literary and intellectual elite of the time
