Neo-Piagetian Theories of Cognitive Development Andreas Demetriou, Michael Shayer, Anastasia Efklides, 2016-07-07 Piagetian theory was once considered able to describe the structure and development of human thought As a result it generated an enthusiasm that it could direct education to develop new teaching methods particularly in science and mathematics However disillusionment with Piagetian theory came rather quickly because many of its structural and developmental assumptions appeared incongruent with empirical evidence In recent years several neo Piagetian theories have been proposed which try to preserve the strengths of Piaget's theory while eliminating its weaknesses At the same time several other models have been advanced originating from different epistemological traditions such as cognitive differential psychology or socio historical approaches Originally published in 1992 this title was unique in representing most of these theories and traditions Specifically the authors focus their work on the educational implications of their research The chapters are organised in three parts the first part presents some widely known models of cognitive development and discusses their implications for different aspects of education the second part is devoted to learning and cognitive acceleration while part three highlights teaching methods that would improve the acquisition of particular skills in specific areas Written by an eminent group of truly international contributors this title will still be useful to students and researchers in cognitive development and education as well as educational policy makers *Resources in Education* , 1998

Competent Reader, Disabled Reader Martin H. Singer, 2024-02-09 In the past frustration with experimental reports had caused educators to dismiss the entire reading research enterprise Originally published in 1982 this book attempts to abstract those experimental results relevant to

developing effective reading programs The book concentrates on the more mechanical aspects of reading skill such as visual discrimination ability visual and auditory memory visual to phonetic translation skills and attentional strategies These skills it is argued account for the major proportion of variance in reading ability The research on both competent and incompetent reading indicates the special importance of such skills to reading The book contains three sections Section I reviews the experimental evidence on competent reading The review highlights consistent threads of evidence and provides a description of the competent reader's strategies for analyzing text Section II reviews research on poor reading This section evaluates the concept of dyslexia and stresses that reading problems are not uniform Section III maintains that the information about competent reading strategies and the impediments to acquiring those strategies should guide educators in evaluating instructional materials and facilitate the diagnosis of reading failure Today it can be read in its historical context

Considering Trilingual Education Kathryn Henn-Reinke, 2012 Based in case studies conducted in the US Europe and Latin America this book explores the feasibility and benefits of trilingual multilingual education in the United States Currently there are few programs in the country of this nature as educators tend to conclude that English language learners would be overwhelmed by study in additional languages Henn Reinke builds an argument supporting trilingual education in the US discussing issues of identity curriculum pedagogy and the impact of other psycho socio linguistic factors Success and Failure in Israeli Elementary Education Abram Minkowich, Dan Deyá¹ 'is, Joseph Bashi, This book presents a comprehensive evaluation study of elementary education in Israel conducted over several years and completed in 1977 The study concentrates on Jewish schools but some data are presented from parallel studies in the Arab Schools A notable feature of the study is its unusually large scope both in size and content It sampled nearly ten percent of Jewish schools and fifteen percent of Arab schools The content includes a great variety of areas cultural origins home conditions and socialization patterns of pupils conditions and practices in schools teachers and principals backgrounds and their attitudes toward central issues in education pupils personality characteristics and motivations related to school experience their learning abilities and achievements in five major school subjects Special emphasis is given to the disadvantaged pupils and an examination of the problem of equality of educational opportunity This study's uniqueness lies in a novel approach in the measurement and analysis of scholastic achievements Like all studies in the psychometric tradition it places pupils in a position related to an advantaged pupil group But test construction and most data analyses were carried out by the criterion reference approach combined with a notion of master learning This enabled presentation of the absolute achievement level of a pupil or a pupil group vis a vis the optimal and minimal requirements of the curriculum and each school subject as well as for its various content area This approach permits much more than the traditional methods utilization of results for deliberation and revision in educational policies This applies particularly to curriculum construction and methods of instruction It may also lead to a more appropriate definition of the disadvantaged pupil Five chapters of the study present a historical review and

sociological analysis of the problems of Israeli education and deal with specific methodological considerations The twelve following chapters present detailed results and analysis for each topic of investigation Teaching Students with Moderate and Severe Disabilities Diane M. Browder, Fred Spooner, Ginevra R. Courtade, and Contributors, 2020-03-04 For years the text of choice for developing excellence as a teacher of K 12 students with moderate and severe disabilities this clearly written work has now been revised and updated Chapters provide step by step procedures for designing standards based individualized education plans and evaluating and enhancing student progress Methods and materials for teaching literacy mathematics science and social studies are described in depth The book also describes effective ways to build functional daily living skills User friendly features include extensive vignettes and classroom examples end of chapter application exercises and reproducible planning and assessment tools Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1 2 x 11 size Subject Areas Key words special education children adolescents special needs learners disabled moderately severely developmental disorders academic interventions academic skills life skills intellectual disability cerebral palsy autism spectrum disorders learning disabilities physical disabilities inclusion classrooms systematic instruction special educators teachers literacy reading mathematics textbooks texts Audience Students in special education and school psychology K 12 special educators school psychologists reading specialists classroom teachers and administrators *Mi Padre* Sarah Gallo, 2017 *Mi Padre* centers on the promise of parent involvement practices that build upon the range of linguistic and sociocultural resources that Latin immigrant students and their families bring to school Through the experiences of Mexican immigrant fathers and their children this book illustrates the need for humanizing family engagement Gallo identifies the many ways these fathers contribute to their children s education and how educators can communicate more effectively with immigrant families *Mi Padre* also shows the consequences of deportation based immigration policies on elementary school education and offers strategies for supporting students and their families in the classroom The author stresses the importance of learning from and with families and offers practical suggestions for how to build relationships with all caregivers as a counterpractice to the one size fits all schooling that many teachers students and families experience today By highlighting fathers with a deep longing for the benefits and opportunities that a good education can offer their children Sarah Gallo has documented how these men redefine what it means to be engaged in their children s schooling Teachers teacher educators researchers and others will all benefit from this beautiful and powerful book Sonia Nieto professor emerita University of Massachusetts Amherst A compelling and lucid example of activist scholarship rooted in rigorous ethnographic inquiry a must read for pre and inservice teachers grappling with how to work in solidarity with families that are threatened by racism and exclusionary notions of citizenship Gerald Campano University of Pennsylvania author of *Partnering with Immigrant Communities* **Individual Development from 3 to 12** Franz E.
