Show Memorandum For Life Science March Paper 2014:

The Dynamic Frame Patrick Keating, 2019-02-19 The camera's movement in a film may seem straightforward or merely technical. Yet skillfully deployed pans, tilts, dollies, cranes, and zooms can express the emotions of a character, convey attitude, and irony, or even challenge an ideological stance. In *The Dynamic Frame*, Patrick Keating offers an innovative history of the aesthetics of the camera that examines how camera movement shaped the classical Hollywood style. In careful readings of dozens of films including *Sunrise*, *The Grapes of Wrath*, *Rear Window*, *Sunset Boulevard*, and *Touch of Evil*, Keating explores how major figures such as F. W. Murnau, Orson Welles, and Alfred Hitchcock used camera movement to enrich their stories and deepen their themes. Balancing close analysis with a broader poetics of camera movement, Keating uses archival research to chronicle the technological breakthroughs and the changing division of labor that allowed for new possibilities, as well as the shifting political and cultural contexts that inspired filmmakers to use technology in new ways. An original history of film techniques and aesthetics, *The Dynamic Frame* shows that the classical Hollywood camera moves not to imitate the actions of an omniscient observer but rather to produce the interplay of concealment and revelation that is an essential part of the exchange between film and viewer.

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school, a social incubator in a largely segregated city that was highly, even improbably, successful throughout its 156-year existence. Established in 1855 as Central High School and reorganized in 1916, Schenley High School was a model of innovative public education and an ongoing experiment in diversity. Its graduates include Andy Warhol, actor Bill Nunn, and jazz virtuoso Earl Hines, and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather. The subject of investment as well as destructive neglect, the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt. Integrated decades before *Brown v. Board of Education*, Schenley succumbed to de facto segregation during the white flight of the 1970s; it rose again to prominence in the late 1980s when parents camped out in six-day-long lines to enroll their children in visionary superintendent Richard C. Wallace's reinvigorated school. Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh, officials closed the school in 2008, citing over \$50 million in necessary renovations, a controversial event that captured national attention. Schenley alumnus Jake Oresick tells this story through interviews, historical documents, and hundreds of first-person accounts drawn from a community indelibly tied to the school. A memorable, important work of local and educational history, his book is a case study of desegregation, magnet education, and the changing nature and legacies of America's oldest public schools.

Making Ukraine Olena Palko, Constantin Ardeleanu, 2022-05-15 Russia's illegal annexation of Crimea in 2014 and the ongoing war in eastern Ukraine have brought scholarly and public attention to Ukraine's borders. *Making Ukraine* aims to investigate the various processes of negotiation, delineation, and contestation that have shaped the country's borders.

throughout the past century Essays by contributors from various historical fields consider how when and under what conditions the borders that historically define the country were agreed upon A diverse set of national and transnational contexts are explored with a primary focus on the critical period between 1917 and 1954 Chapters are organized around three main themes the interstate treaties that brought about the new international order in Eastern Europe in the aftermath of the world wars the formation of the internal boundaries between Ukraine and other Soviet republics and the delineation of Ukraine s borders with its western neighbours Investigating the process of bordering Ukraine in the post Soviet era contributors also pay close attention to the competing visions of future relations between Ukraine and Russia Through its broad geographic and thematic coverage Making Ukraine illustrates that the dynamics of contemporary border formation cannot be fully understood through the lens of a sole state frontier or ideology and sheds light on the shared history of territory and state formation in Europe and the wider modern world

The Professions and Civic Life Gary J.

Schmitt,2016-06-10 Professions are institutions which through their small size self governing elements and sense of social mission can assist in maintaining a sound civic culture As mediating institutions in our democratic society that are neither entirely birthed by the state nor are entirely private the individual professions such as the legal and education professions journalism economics architecture or the military arguably present practical avenues through which to teach civic behavior and to restore Americans broken trust This volume on the professions and civic life undertakes a unique and timely examination of twelve individual professions to see how each affects the character of American citizenship and the civic culture of the nation through their practices and ethos Among the questions each essay in the volume addresses are What is distinctive or not about the specific profession as it came to be practiced in the United States Given the specialized knowledge training and sometimes licensing of a profession what do the professions perceive to be their role in promoting the larger common good How can we bring professionals expert knowledge to bear on social problems in an open and deliberative way Is the ethic of a particular profession as it understands itself today at odds with the American conception of self government and a healthy civic life Through analysis of these questions each chapter presents a rich treatment of how the twelve longstanding professions of political science teaching the law the military economics medicine journalism literature science architecture music and history help support and challenge the general public s civic behavior in general and their attachment to the American regime in particular
