Great Britain. Parliament. House of Lords,2006 **Special Advocates in the Adversarial System** John Jackson,2019-07-24 The last twenty years have seen an unprecedented rise in the use of secret courts or closed material proceedings largely brought about in response to the need to protect intelligence sources in the fight against terrorism This has called into question the commitment of legal systems to long cherished principles of adversarial justice and due process Foremost among the measures designed to minimise the prejudice caused to parties who have been excluded from such proceedings has been the use of special advocates who are given access to sensitive national security material and can make representations to the

court on behalf of excluded parties Special advocates are now deployed across a range of administrative civil and criminal proceedings in many common law jurisdictions including the UK Canada New Zealand Hong Kong and Australia This book analyses the professional services special advocates offer across a range of different types of closed proceedings Drawing on extensive interviews with special advocates and with lawyers and judges who have worked with them the book examines the manner in which special advocates are appointed and supported how their position differs from that of ordinary counsel within the adversarial system and the challenges they face in the work that they do Comparisons are made between different special advocate systems and with other models of security cleared counsel including that used in the United States to consider what changes might be made to strengthen their adversarial role in closed proceedings In making an assessment of the future of special advocacy the book argues that there is a need to reconceptualise the unique role that special advocates play in the administration of justice

International Human Rights Law Olivier De Schutter, 2014-08-07 The leading textbook on international human rights law is now better than ever The content has been fully updated and now provides more detailed coverage of substantive human rights along with new sections on the war on terror and on the progressive realization of economic and social rights making this the most comprehensive book in the field It has a new more student friendly text design and has retained the features which made the first edition so engaging and accessible including the concise and critical style and questions and case studies within each chapter as well as suggestions for further reading Written by De Schutter whose extensive experience working in the field and teaching the subject in both the US and EU gives him a unique perspective and valuable insight into the requirements of lecturers and students This is an essential tool for all students of international human rights law

The justice and security green paper Great Britain: Parliament: Joint Committee on Human Rights, 2012-04-04 The Joint Committee on Human Rights JCHR calls for statutory clarification of law on disclosure of national security sensitive material but finds no case for more extensive change The Government has failed to make the case for extending closed material procedures to all civil proceedings and to inquests the Government has not demonstrated that the fairness concern on which it relies to justify the proposal is in fact a real and practical problem The Committee believes that closed material procedures are inherently unfair and the proposals in the Green Paper are a radical departure from longstanding traditions of open justice and fairness Nor does it accept that replacing the current law governing disclosure of sensitive material the law of Public Interest Immunity or PII with closed material procedures is justified The rule of law requires that decisions about the disclosure of material in legal proceedings be taken by judges not ministers and the current legal framework of PII has not been shown to be inadequate There is a case however for that legal framework to be made clearer in the way in which it applies to national security sensitive material and the Committee suggests how that could be done by legislation and changes to the Coroners Rules and guidance The Committee regrets that the Green Paper overlooks the very considerable impact of its proposals on the freedom and ability of the media to report on

matters of public interest and concern

Terror Detentions and the Rule of Law Robert Hall Wagstaff, 2014 After the 9 11 terrorist attacks the United States and the United Kingdom detained suspected terrorists in a manner incompatible with the due process fair trial and equality requirements of the Rule of Law The legality of the detentions was challenged and found wanting by the highest courts in the US and UK The US courts approached these questions as matters within the law of war whereas the UK courts examined them within a human rights criminal law context In Terror Detentions and the Rule of Law US and UK Perspectives Dr Robert H Wagstaff documents President George W Bush s and Prime Minister Tony Blair s responses to 9 11 alleging that they failed to protect the human rights of individuals suspected of terrorist activity The analytical focus is on the four US Supreme Court decisions involving detentions in Guantanamo Bay and four House of Lords decisions involving detentions

that began in the Belmarsh Prison These decisions are analyzed within the contexts of history criminal law constitutional law human rights and international law and various jurisprudential perspectives In this book Dr Wagstaff argues that time tested criminal law is the normatively correct and most effective means for dealing with suspected terrorists He also suggests that preventive indefinite detention of terrorist suspects upon suspicion of wrongdoing contravenes the domestic and international Rule of Law treaties and customary international law As such new legal paradigms for addressing terrorism are shown to be normatively invalid illegal unconstitutional counter productive and in conflict with the Rule of Law

Identity and Diversity on the International Bench Freya Baetens, 2020-12-10 International courts and tribunals hold the power to decide on questions involving sovereignty over territory grave human rights violations international crimes or millions of euros worth of economic interests Judges and arbitrators are the faces and arguably the drivers of international adjudication Yet certain groups tend to be overrepresented on international benches while others remain underrepresented Although international courts and tribunals differ in their institutional make up and functions they all rely in essence on the judgement of a group of individuals each with their own background and experience Even if adjudicators identity is not the only and may not be the decisive influence on their decision making the relative lack of diversity has an effect on the judicial process and its outcomes which in turn entails broader implications for the legitimacy of international law This book analyses the implications of identity and diversity across numerous international adjudicatory bodies focusing on a wide range of factors Lack of diversity within the judiciary has been identified as a legitimacy concern in domestic settings and the last few years have seen increasing attention to this question at the international level as well making the book both timely and topical
