Alfaro, Ramon Vilanova, 2016-04-16 This book presents a unified methodology for the design of PID controllers that encompasses the wide range of different dynamics to be found in industrial processes This is extended to provide a coherent way of dealing with the tuning of PID controllers The particular method at the core of the book is the so called model reference robust tuning MoReRT developed by the authors MoReRT constitutes a novel and powerful way of thinking of a robust design and taking into account the usual design trade offs encountered in any control design problem The book starts by presenting the different two degree of freedom PID control algorithm variations and their conversion relations as well as the indexes used for performance robustness and fragility evaluation the bases of the proposed model Secondly the MoReRT design methodology and normalized controlled process models and controllers used in the design are described in order to facilitate the formulation of the different design problems and subsequent derivation of tuning rules In later chapters the application of MoReRT to over damped inverse response integrating and unstable processes is described The book ends by presenting three possible extensions of the MoReRT methodology thereby opening the door to new research developments In this way the book serves as a reference and source book for academic researchers who may also consider it as a stimulus for new ideas as well as for industrial practitioners and manufacturers of control systems who

will find appropriate advanced solutions to many application problems Comunicaciones Industriales Siemens Vicenç Guerrero Jimenez, Ramon Yuste Yuste, Lluís Martínez, 2012-07 La automatización y control de las Comunicaciones Industriales es un sector que dada su continua evolución tecnológica tiende a ser autodidacta. No suele haber documentación que pueda ayudar a su aprendizaje a lo sumo algún texto que no pasa de conceptos puramente teóricos. Todo esto implica que para conseguir una base práctica suficiente se debe dedicar una gran cantidad de tiempo. Esperamos que este libro cubra este hueco. A QUIEN VA DIRIGIDO Nuestra experiencia en el ámbito de la enseñanza nos ha llevado a diseñar un libro con un enfoque totalmente práctico de los diferentes temas tratados garantizando así el aprendizaje de estas tecnologías aplicadas tanto para el que ha de enseñar como para el que ha de aprender y el que las tiene que aplicar. Este libro ha sido creado con un objetivo principal el de que cualquier persona interesada en las Comunicaciones Industriales pueda aprender practicando. Para ello y desde el primer día podrá empezar a elaborar unos proyectos totalmente desarrollados y otros propuestos. Todos ellos sobre los diferentes buses de campo presentados: AS I, PROFIBUS, ETHERNET, PROFINET, TECNOLOGÍA IT web de control, REDES WIRELESS EN EL ÁMBITO INDUSTRIAL. El libro está orientado tanto a estudiantes de Ciclos Formativos de Grado Superior como a ingenieros técnicos y a profesionales del sector de la automatización industrial. ARCHIVOS NECESARIOS Por cortesía de Siemens este libro se complementa con un DVD que contiene la última versión del software STEP 7 Professional para poder realizar todos y cada uno de los ejercicios presentados. Además se puede acceder a la web de la editorial Marcombo www.marcombo.com para descargarse las soluciones de todos los ejercicios propuestos. ESTRUCTURA DE CADA UNIDAD Todos los contenidos del libro se han realizado con equipos Siemens. Esto no significa que no se puedan utilizar equipos de otros fabricantes ya que los buses sobre los que versan las prácticas presentadas se refieren a buses industriales estándar utilizados por la mayoría de fabricantes del sector de la automatización y las comunicaciones industriales.
