The large number of examples throughout the text makes the steps in conducting a survey clear and easy to follow. Covers only methods that are realistic for use by students who are conducting a survey within a single semester. For data analysis, the emphasis is on the use of basic statistics with the computation of a small number of descriptive statistics illustrated. Easy to calculate margins of error are also illustrated. How to Get Published and Win Research Funding Abby Day, 2023-06-19. Most journal articles and research proposals are rejected. That represents a waste of everyone's time, energy, and spirit, especially now when more than ever academic careers are precarious. In this practical book, Professor Abby Day addresses these two interrelated and most challenging areas for academics and researchers in their professional careers: how to secure research funding and how to get research published. Reviewers, unpaid and often unappreciated, are over-stretched with their regular academic jobs and increasingly reluctant to spend time reading poorly constructed papers or proposals. As fewer reviewers are available, the waiting time for a decision increases. Everyone loses. It doesn't have to be like that. Professor Day's ground-breaking strategy covers both publishing and funding challenges in similar yet distinct ways. Lack of time. Conflicting priorities. No idea where to start or what matters most. This book explains how to overcome these and other common obstacles to successful publication and funding. For the first time, one book covers both activities with practical guidance for setting your strategy and purpose, identifying the right publisher or funder, and understanding your audience and the key criteria for success, as well as helpful advice for writing and managing the challenges of an academic career.
