

How To Write Up A Science Experiment

Why write up a science experiment? Science reports are interesting because they tell a very special kind of story, the story of an event you took part in, which could be described to others and then maybe repeated by them. It's important that experiment reports tell readers something new, or inspire them to investigate for themselves.

(Field) What your text is going to be about

- First, you will inform your reader what your experiment was about, using one or two sentences. (A short introduction.)
- Next, share your prediction with your reader. What did you expect to see?
- Then tell the reader what equipment was needed.
- Describe each step of the experiment.
- Show the results. You can use writing, tables, graphs or photographs.
- Explain how your prediction was correct - or not.
- Maybe share what you plan to investigate next because of what you found out in this experiment.

(Tenor) Your role as the writer

- Inform your reader of your experiment and prediction.
- Give your reader a very clear description of each stage of the experiment.
