Reading Work Mary Ellen Belfiore, Tracy A. Defoe, Sue Folinsbee, Judy Hunter, Nancy S. Jackson, 2004-02-04

Reading Work Literacies in the New Workplace explores changing understandings of literacy and its place in contemporary workplace settings. It points to new questions and dilemmas to consider in planning and teaching workplace education. By taking a social perspective on literacies in the workplace, this book challenges traditional thinking about workplace literacy as functional skills and enables readers to see the complexity of literacy practices and their embeddedness in culture, knowledge, and action. A mixture of ethnographic studies, analysis, and personal reflections makes these ideas accessible and relevant to a wide range of readers in the fields of adult literacy and language education and helps to bridge the divide between theory and practice in the field of workplace education. *Reading Work Literacies in the New Workplace* features four distinct but related ethnographies of literacy use in contemporary workplaces: a social practice view of literacy brought to the workplace; collaborative research undertaken by experienced workplace educators and academics working in the areas of adult literacy and second language learning; implications for both practice and theory presented not as a series of steps but rather as reflections by seasoned educators on shared dilemmas; and engaging, accessible writing that encourages workplace practitioners to read, learn from, and do their own research. This book is an important resource for practicing workplace educators, trainers, and instructors; academics who teach workplace educators; unionists; policymakers; human resource managers; supervisors; or quality coordinators who believe education can make a difference and are interested in seeing maximum results from workplace learning. Multiple Case Study Analysis Robert E. Stake, 2013-04-29 Examining situational complexity is a vital part of social and behavioral science research. This engaging text provides an effective process for studying multiple cases such as sets of teachers' staff development sessions or clinics operating in different locations within one complex program. The process also can be used to investigate broadly occurring phenomena without programmatic links such as leadership or sibling rivalry. Readers learn to design, analyze, and report studies that balance common issues across the group of cases with the unique features and context of each case. Three actual case reports from a transnational early childhood program illustrate the author's approach, and helpful, reproducible worksheets facilitate multicase recording and analysis.
