,1997 **Equity in Multilingual Schools and Communities** Amanda K. Kibler,Aída Walqui,George C. Bunch,Christian J. Faltis,2024-05-14 This book honors the impactful contributions of Guadalupe Vald s toward equity in multilingual schools and communities As one of the first language education scholars to examine the vibrant language practices of bilingual users in the US Southwest her work marked a departure from traditional foreign language approaches and sparked a movement focused on valuing heritage languages and creating more equitable educational systems for young people from linguistically minoritized backgrounds Influenced by the work of Professor Vald s the contributors to this book draw on multiple aspects of her research to look at new ways of addressing equity and social justice for multilingual users in schools and communities Chapters focus on three major areas of her work the nature of languages and literacies in multilingual contexts language development in classrooms and communities and equity and access At the end of each section short interludes describe contributors personal experiences of learning from and with Professor Vald s providing insight into the practices of mentorship and professional development within the field This volume will appeal to students and researchers across bilingualism applied linguistics and education offering an overview of developments in these fields and directions for future research on equity in multilingual educational settings *Mathematics (Education) in the Information Age* Stacy A. Costa,Marcel Danesi,Dragana Martinovic,2020-12-10 This book brings together ideas from experts in cognitive science mathematics and mathematics education to discuss these issues and to present research on how mathematics and its learning and teaching are evolving in the Information Age Given the ever broadening trends in Artificial Intelligence and the processing of information generally the aim is to assess their implications for how math is evolving and how math should now be taught to a generation that has been reared in the Information Age It will also look at the ever spreading assumption that human intelligence may not be unique an idea that dovetails with current philosophies of mind such as posthumanism and transhumanism The role of technology in human evolution has become critical in the contemporary world Therefore a subgoal of this book is to illuminate how humans now use their sophisticated technologies to chart cognitive and social progress Given the interdisciplinary nature of the chapters this will be of interest to all kinds of readers from mathematicians themselves working increasingly with computer scientists to cognitive scientists who carry out research on mathematics cognition and teachers of mathematics in a classroom Arguing with Numbers James Wynn,G. Mitchell Reyes,2021-04-15 As discrete fields of inquiry rhetoric and mathematics have long been considered antithetical to each other That is if mathematics explains or describes the phenomena it studies with certainty persuasion is not needed This volume calls into question the view that mathematics is free of rhetoric Through nine studies of the intersections between these two disciplines *Arguing with Numbers* shows that mathematics is in fact deeply rhetorical Using rhetoric as a lens to analyze mathematically based arguments in public policy political and economic theory and even literature the essays in this volume reveal how

mathematics influences the values and beliefs with which we assess the world and make decisions and how our worldviews influence the kinds of mathematical instruments we construct and accept In addition contributors examine how concepts of rhetoric such as analogy and visuality have been employed in mathematical and scientific reasoning including in the theorems of mathematical physicists and the geometrical diagramming of natural scientists Challenging academic orthodoxy these scholars reject a math equals truth reduction in favor of a more constructivist theory of mathematics as dynamic evolving and powerfully persuasive By bringing these disparate lines of inquiry into conversation with one another Arguing with Numbers provides inspiration to students established scholars and anyone inside or outside rhetorical studies who might be interested in exploring the intersections between the two disciplines In addition to the editors the contributors to this volume are Catherine Chaput Crystal Broch Colombini Nathan Crick Michael Dreher Jeanne Fahnstock Andrew C Jones Joseph Little and Edward Schiappa **Blended Learning in Grades 4–12** Catlin R. Tucker, 2012-06-13 This book comes at the right time with answers for teachers principals and schools who want to be on the cutting edge of the effective use of technology the internet and teacher pedagogy
