Higher education for public good Noluthando S. Matsiliza, 2023-03-01 This book focuses on the knowledge area of higher education governance organisational dynamics leadership and decolonisation We have observed that governance discourse has been excluded in debates that concern the public good The construct of public good seeks to support higher education that does not support a capitalist view of profit making arguably to respond to societal demands and needs such as developmental efforts through academic functions Higher Education focuses on interconnected multi disciplinary constructs intending to provide services for the public good The issue of public good is an interesting construct that puts universities on the spot since they are expected to be responsive to environmental changes and stakeholder needs through the functioning of accountable governance structures These governance structures are compelled to comply with policy demands within external and internal environmental factors This experience has exposed universities to systematic challenges that are local regional and global and which forces them to adapt while serving stakeholders and society This book will also interrogate the governance of South African public universities in the post decolonisation era and new demands from stakeholders

The Michigan Alumnus, 1967 In v 1 8 the final number consists of the Commencement annual

Shifting Boundaries of Knowledge Tessa Marcus, Alexandra Hofmänner, 2006 In 2004 South Africa's National Research Foundation NRF initiated a foresight exercise on the challenges of knowledge making in social sciences law and the humanities SSLH in South Africa in the 21st century The main contributions to this project are collected in this volume It is designed to open horizons about the value of and prospects for SSLH research while simultaneously promoting and stimulating scholarship in this domain The contributions provide a useful starting point for thinking about the current state of SSLH research and gives researchers locked into single disciplinary perspectives a taste of the debates and trends in allied disciplines They also provide an organizing frame for a new broad based open conversation among the many interested parties involved in producing reproducing and disseminating knowledge
