THE STORM

Ben and Jason are super excited because tonight is the first night their parents are leaving them alone at home to fend for themselves. "You're old enough now boys. It's time for you to learn some responsibility," they had said as they left for dinner. The boys couldn't wait to have the house to themselves. They had big plans to raid the pantry, run around the house, and stay up really late.

The boys were just settling down on the couch with a bag of popcorn when they heard a loud rumbling. It sounded like a jet plane was passing over the house. They looked out the window, just as a large flash of lightning lit up the sky! Without warning, huge drops of rain started pelting down on the windows. The boys jumped back, startled. Large hailstones started smashing onto the tin roof. The sound was deafening!

The boys ran into the middle of the room, shaking with fear. A strong wind started blowing around the house, rattling the windows and shaking the walls. Ben and Jason started to feel like the whole house was going to collapse on top of them. They stood together, trembling, listening to the sound of the storm all around them.

Then suddenly, it was quiet. Not a sound. The storm was over! The boys sat on the couch, too frightened to move as they waited anxiously for their parents to come home. So much for their exciting night home alone.

obvious However the cognitive mechanisms that participate in prose comprehension are far from obvious Even simple stories involve complexities that have stymied many cognitive scientists Why is prose comprehension so difficult to study Perhaps because comprehension is guided by so many domains of knowledge Perhaps because some critical mysteries of prose comprehension reside between the lines in the mind of the comprehender Ten years ago very few psychologists were willing to dig beyond the surface of explicit code in their studies of discourse processing Tacit knowledge world knowledge inferences and expectations were slippery notions that experimental psychologists managed to circumvent rather than understand In many scientific circles it was taboo to investigate mechanisms and phenomena that are not directly governed by the physical stimulus Fortunately times have changed Cognitive scientists are now vigorously exploring the puzzles of comprehension that lie beyond the word The study of discourse processing is currently growing at a frenetic pace
