Militarization and nuclearization were the historical developments most essential to the creation of the rural New Right Both North Dakota and South Dakota have long been among the most reliably Republican states in the nation in the past century voters have only chosen two Democrats Franklin Roosevelt and Lyndon B Johnson and in 2016 both states preferred Donald Trump by over thirty points Yet in the decades before World War II the people of the Northern Plains were not universally politically conservative Instead many Dakotans including Republicans supported experiments in agrarian democracy that incorporated ideas from populism and progressivism to socialism and communism and fought against bigness in all its forms

including bonanza farms out of state railroads corporations banks corrupt political parties and distant federal bureaucracies but also surprisingly the culture of militarism and the expansion of American military power abroad In Nuclear Country Catherine McNicol Stock explores the question of why between 1968 and 1992 most voters in the Dakotas abandoned their distinctive ideological heritage and came to embrace the conservatism of the New Right Stock focuses on how this transformation coincided with the coming of the military and national security states to the countryside via the placement of military bases and nuclear missile silos on the Northern Plains This militarization influenced regional political culture by reinforcing or re contextualizing long standing local ideas and practices particularly when the people of the plains found that they shared culturally conservative values with the military After adopting the first two planks of the New Right national defense and conservative social ideas Dakotans endorsed the third plank of New Right ideology fiscal conservatism Ultimately Stock contends that militarization and nuclearization were the historical developments most essential to the creation of the rural New Right throughout the United States and that their impact can best be seen in this often overlooked region s history
