

lamb prosciutto.

In this natural light shot I wanted a very graphic (illustrative) look to the picture. My concept was that it would be rather lovely to shoot the hanging meat in a strong side light, graduating to dark on the opposing side.

I was getting the meat ready to go in to the curing chamber one day and saw the garage door roll just above my chamber. PERFECT! I thought, I will hang the meat from here, and shoot it down here in the garage.

This worked out great, because I wanted a wide strong side light on the hanging pieces of meat. For this you need a very large light source, that is soft - very much like the large voluminous light of an open garage door.

The darkness on the other side of the meat happens naturally - The garage is a long narrow space with no other windows - void! Dark room, lit from one end. If you didn't have the setup, you could quite easily use a few large pieces of black foam core board on the other side of the meat to stop light bouncing back on to that side.

Behind the meat I have a piece of black foam board propped up to give a dark background. Because of the light coming in from the door, this didn't photograph as dark as intended (thereby, it never does). That is when the magic of post production enters in.
