Practical Evaluation for Educators Roger Kaufman, Ingrid Guerra, William A. Platt, 2005-07-20 Roger Kaufman and his colleagues have produced what is simply the best practical book on educational evaluation published in the past few years It

is current clearly written and structured in a way that educators can apply it in a huge variety of educational contexts

Richard Clark Professor University of Southern California As an evaluation book written for educators and education this publication delivers on its promise It provides a practical professional and comprehensive approach for planning and conducting evaluation studies that are meaningful and effective for understanding and improving the education enterprise

Dale W Lick Professor College of Education Florida State University Tallahassee The book describes how to ask and answer the right questions in order to measure the gaps in results and their consequences Readers will be able to custom tailor an evaluation plan for their specific situations Practical examples and scenarios along with how to do it guides show readers how to apply the concepts and tools presented

James D Russell EdD Professor Visiting Research Associate Educational Psychology and Learning Systems Institute Florida State University Tallahassee This book puts evaluation in a framework of societal needs while simultaneously being results oriented and practical This is a unique combination of how to with why that is of immense importance in the present time when the public value of education seems to have been lost while citizens also demand specifics

Elizabeth D Capaldi Vice Chancellor Chief of Staff State University of New York Use program evaluations to define measurable results and deliver meaningful outcomes Finding a straightforward approach to educational evaluations is the most important step toward discovering and reporting the meaningful results underlying the hard work of education

Kaufman Guerra and Platt present program evaluation as a trouble free process that any educator can effectively complete while providing the evidence required to justify and validate any educational endeavor Drawing from the education business and military fields this accessible resource shows educators administrators politicians learners and parents how to distill evaluations to uncover what works and what doesn't

Practical Evaluation for Educators breaks down the program evaluation process into four easy to understand steps Align and direct evaluation questions into useful queries aimed at the intended results of educational programs Observe to gather pertinent valid and useful data Compare the results of what was accomplished to what was planned to be accomplished Use the data by taking action and adjusting programs to bring them into alignment with societal needs

When educators see evaluation as a simple useful tool for improving programs measurable results become meaningful

Digging into Software Knowledge Generation in Cultural Heritage Patricia

Martin-Rodilla, 2017-10-14 This book focuses on innovative strategies to manage and build software systems for generating new knowledge from large archaeological data sets The book also reports on two case studies carried out in real world scenarios within the Cultural Heritage setting The book presents an original conceptual framework for developing software solutions to assist the knowledge generation process in connection with large archaeological data sets and related cultural heritage information a context in which the inputs are mainly textual sources written in freestyle i e without a predetermined standard structure Following an in depth exploration of recent works on the knowledge generation process in the above mentioned context and IT based options for facilitating it the book proposes specific new techniques capable of capturing the

structure and semantics implicit in such textual sources and argues for using this information in the knowledge generation process The main result is the development of a conceptual framework that can accommodate textual sources and integrate the information included in them into a software engineering framework The said framework is meant to assist cultural heritage professionals in general and archaeologists in particular in both knowledge extraction and the subsequent decision making process
