A Style and Usage Guide to Writing About Music Thomas Donahue, 2010-04-01 In *A Style and Usage Guide to Writing About Music* Thomas Donahue presents a collection of

guidelines to help express through the written word the special notations terms and concepts found in the discipline of music. It concentrates on questions of style and format in the interest of good formal writing within the context of United States English so that writers may communicate their ideas clearly and effectively. While compiling the guidelines, Donahue reviewed content from many other music and general guides. He documented the most common formats in order to assist the writer in selecting an appropriate format for the given circumstance when more than one may apply. The book draws on profuse musically oriented examples and is arranged by topics both musical and typographic such as the proper use and spelling of composer names and musical concepts, the use of notes, pitches, and octave delineations, letters and numbers employed to describe form and harmony, when, where, and how to apply compound words and hyphenation of terms and names, and the proper citation of musical and audiovisual sources. The book concludes with a glossary of typographic terms, a bibliography, and a comprehensive index, making this a valuable resource for students, scholars, teachers, and writers.

Business Writing Style Guide: American English Version Verne Ordman & Associates Pty Ltd, 2008 **The Writer's Style** Paul Butler, 2018-12-21. Designed to help all writers learn to use style as a rhetorical tool taking into account audience, purpose, context, and occasion. The Writer's Style is not only a style guide for a new generation but a new generation of style guide. The book helps writers learn new strategies inductively by looking at firsthand examples of how they operate rhetorically as well as deductively through careful explanations in the text. The work focuses on invention, allowing writers to develop their own style as they analyze writing from varied genres. In a departure from the deficiency model associated with other commonly used style guides, author Paul Butler encourages writers to see style as a malleable device to use for their own purposes rather than a domain of rules or privilege. He encourages writing instructors to present style as a practical, accessible, and rhetorical tool working with models that connect to a broad range of writing situations, including traditional texts like essays, newspaper articles, and creative nonfiction, as well as digital texts in the form of tweets, Facebook postings, texts, email, visual rhetoric, YouTube, and others. Though designed for use in first-year composition courses in which students are learning to write for various audiences, purposes, and contexts, The Writer's Style is a richly layered work that will serve anyone considering how style applies to their professional, personal, creative, or academic writing.
