The Mathematics Of Love:

The Mathematics of Love Hannah Fry, 2015-02-03 In this must have for anyone who wants to better understand their love life a mathematician pulls back the curtain and reveals the hidden patterns from dating sites to divorce sex to marriage behind the rituals of love The roller coaster of romance is hard to quantify defining how lovers might feel from a set of simple equations is impossible But that doesn't mean that mathematics isn't a crucial tool for understanding love Love like most things in life is full of patterns And mathematics is ultimately the study of patterns from predicting the weather to the fluctuations of the stock market the movement of planets or the growth of cities These patterns twist and turn and warp and evolve just as the rituals of love do In *The Mathematics of Love* Dr Hannah Fry takes the reader on a fascinating journey through the patterns that define our love lives applying mathematical formulas to the most common yet complex questions pertaining to love What's the chance of finding love What's the probability that it will last How do online dating algorithms work exactly Can game theory help us decide who to approach in a bar At what point in your dating life should you settle down From evaluating the best strategies for online dating to defining the nebulous concept of beauty Dr Fry proves with great insight wit and fun that math is a surprisingly useful tool to negotiate the complicated often baffling sometimes infuriating always interesting mysteries of love

The Mathematics of Love Sonia Hunt, 2021-01-25 In *The mathematics of love* Sonia Hunt uses irony with flair whether she is teasing her resident mathematician in *An orange for you* with *I wanted to show you how an orange is peeled but I was stopped by its bite on my tongue* or mocking herself in the playful *Migraine* sequence *migraine is a lot like childbirth you really don't want to be there* The satirical *To my coy mistress* inspired by T S Eliot's *Cats* is a flight of fancy The philosophically challenged *Cleopatra* deftly moves us between Buddhism and Existentialism with a nod to writers such as Nietzsche and Keats *The mathematics of love* is an eclectic mix from a poet who loves the sensuality of words and can make them jump Colleen Keating Sonia Hunt's poetry is about love love that ranges from the ironically mathematical to the mystical In *The mathematics of love* she skilfully writes about moods and emotions with a deep sensuality and passion

John Egan **Love and Math** Edward Frenkel, 2013-10-01 An awesome globe spanning and New York Times bestselling journey through the beauty and power of mathematics What if you had to take an art class in which you were only taught how to paint a fence What if you were never shown the paintings of van Gogh and Picasso weren't even told they existed Alas this is how math is taught and so for most of us it becomes the intellectual equivalent of watching paint dry In *Love and Math* renowned mathematician Edward Frenkel reveals a side of math we've never seen suffused with all the beauty and elegance of a work of art In this heartfelt and passionate book Frenkel shows that mathematics far from occupying a specialist niche goes to the heart of all matter uniting us across cultures time and space *Love and Math* tells two intertwined stories of the wonders of mathematics and of one young man's journey learning and living it Having braved a discriminatory educational system to become one of the twenty-first century's leading mathematicians Frenkel now works on one of the biggest ideas to come out of math in the last 50 years the Langlands Program Considered by many to be a Grand Unified Theory of mathematics the Langlands Program enables researchers to translate findings from one field to another so that they can solve problems such as Fermat's last theorem that had seemed intractable before At its core *Love and Math* is a story about accessing a new way of thinking which can enrich our lives and empower us to better understand the world and our place in it It is an invitation to discover the magic hidden universe of mathematics

Secondary Mathematics for Mathematicians and Educators Michael Weiss, 2020-10-05 In this engaging text Michael Weiss offers an advanced view of the secondary mathematics curriculum through the prism of theory analysis and history aiming to take an intellectually and mathematically mature perspective on the content normally taught in high school mathematics courses Rather than a secondary mathematics textbook Weiss presents here a textbook about the secondary mathematics curriculum written for mathematics educators and mathematicians and presenting a long overdue modern day integration of the disparate topics and methods of secondary mathematics into a coherent mathematical theory Areas covered include Polynomials and polynomial functions Geometry

graphs and symmetry Abstract algebra linear algebra and solving equations Exponential and logarithmic functions Complex numbers The historical development of the secondary mathematics curriculum Written using precise definitions and proofs throughout on a foundation of advanced content knowledge Weiss offers a compelling and timely investigation into the secondary mathematics curriculum relevant for preservice secondary teachers as well as graduate students and scholars in both mathematics and mathematics education

Quantum Love Jeffrey Strickland, 2017-03-19 In *Quantum* Faith Dr Strickland argued that Science and Scripture are not at odds and Faith has substance In *Quantum Hope* he argued that Hope is tangible In *Quantum Love* he argues that Love is measureable However we cannot choose one of these in favor of the other Certainly Love is the greatest but a relationship exist between Faith Hope and Love which requires all three working together *Quantum Love* argues from the base of Scripture that Love is not some abstract concept and that real love is only possible with the presence of the Holy Spirit Although the Bible is the basis Dr Strickland injects frequent episodes of What I Learned at the Movies Often Hollywood gets it wrong but there is an occasional nugget

Exploring Mathematics and Science Teachers' Knowledge Hamsa Venkat, Marissa Rollnick, John Loughran, Mike Askew, 2014-05-09 Globally mathematics and science education faces three crucial challenges an increasing need for mathematics and science graduates a declining enrolment of school graduates into university studies in these disciplines and the varying quality of school teaching in these areas Alongside these challenges internationally more and more non specialists are teaching mathematics and science at both primary and secondary levels and research evidence has revealed how gaps and limitations in teachers content understandings can lead to classroom practices that present barriers to students learning This book addresses these issues by investigating how teachers content knowledge interacts with their pedagogies across diverse contexts and perspectives This knowledge practice nexus is examined across mathematics and science teaching traversing schooling phases and countries with an emphasis on contexts of disadvantage These features push the boundaries of research into teachers content knowledge The book s combination of mathematics and science enriches each discipline for the reader and contributes to our understandings of student attainment by examining the nature of specialised content knowledge needed for competent teaching within and across the two domains *Exploring Mathematics and Science Teachers Knowledge* will be key reading for researchers doctoral students and postgraduates with a focus on Mathematics Science and teacher knowledge research

Peace & Love Leland

Bedford,2014-02-07 Peace Love is a celebration of truth like none before and like none that will be after truly one of a kind The selections within are a reflection of thought that is like a seed to the brain of every man woman and child to be watered by life and grow into an existence where love is the end result of new found peace The lie has no home with in the pages of this book because the lie holds no truth like a World created by God that holds no peace nor love In time we live and in time it is promised that we will forever be so in time Peace Love has been placed to collectively bring them that are unconscious to a new consciousness of life death truth lie good evil victory defeat success failure hope eternal hope God Jesus and the Devil you me and we To all that search for understanding and are a student of inspiration with in this book holds a gift of sincerity with the purpose to build and destroy to build a new idea that is the antithesis of all that has kept us in the dark all that has kept us from one another and destroy all that has shined light on that which we are not that has made are sunshine like Hells fire rather than the warmth of Gods love Opening this book will open your eyes though you have never been blind and will breath new air into the lungs that were given by the Father to live like any food for nourishment the knowledge within can do no harm only feed the soul Like anything all may not see what is shown as one mans treasure is another mans trash but as trash is unwanted so is the absence of peace and love in a World were Christ is King and we live in search of life life everlasting this I believe is like motivation to grow with out digression and to digress through progression Inspirational words thoughts and ideas live with in the pages of Peace Love thoughts of happiness and joy pain and agony victory and defeat good and evil God and the Devil Heaven and Hell hope and despair with the purpose to discover truth that will bring clarity to the chaos which can cloud the mind soul spirit and body of any man woman or child letting all whom may journey through its pages know that all are apart of the collective conscious that defines who we are and that we can only be we if there is peace and love The Disorder of Mathematics Education Hauke Straehler-Pohl,Nina Bohlmann,Alexandre

Pais,2016-08-23 Research within a socio political paradigm or turn has been gradually recognized and institutionalized as an important part of mathematics education This book focuses on the neglected problems tensions and contradictions evoked by this process The authors do this by challenging current regimes of truth about mathematics education by identifying how recent technological developments challenge or suspend contemporary conceptions of mathematics education by critiquing the ideological entanglement of mathematics its education and schooling with capitalism by self reflective analyses of researchers impacts on shaping what is and can be perceived as the practice of mathematics education research and by confronting main stream mathematics education with socio political contexts that are usually neglected In this way mathematical rationality becomes contextualized within contemporary society where it reproduces itself through technologies social practices media and other spheres of social life Mathematics for Human Flourishing Francis Su,2020-01-07 Winner of the Mathematics Association of America s 2021 Euler Book Prize this is an inclusive vision of mathematics its beauty its humanity and its power to build virtues that help us all flourish This is perhaps the most important

mathematics book of our time Francis Su shows mathematics is an experience of the mind and most important of the heart James Tanton Global Math Project A good book is an entertaining read A great book holds up a mirror that allows us to more clearly see ourselves and the world we live in Francis Su's Mathematics for Human Flourishing is both a good book and a great book MAA Reviews For mathematician Francis Su a society without mathematical affection is like a city without concerts parks or museums To miss out on mathematics is to live without experiencing some of humanity's most beautiful ideas In this profound book written for a wide audience but especially for those disenchanted by their past experiences an award winning mathematician and educator weaves parables puzzles and personal reflections to show how mathematics meets basic human desires such as for play beauty freedom justice and love and cultivates virtues essential for human flourishing These desires and virtues and the stories told here reveal how mathematics is intimately tied to being human Some lessons emerge from those who have struggled including philosopher Simone Weil whose own mathematical contributions were overshadowed by her brother's and Christopher Jackson who discovered mathematics as an inmate in a federal prison Christopher's letters to the author appear throughout the book and show how this intellectual pursuit can and must be open to all
