Collins, Jr., 2008-08-15 The U.S. Supreme Court is a public policy battleground in which organized interests attempt to etch their economic, legal, and political preferences into law through the filing of amicus curiae (friend of the court) briefs. In *Friends of the Supreme Court: Interest Groups and Judicial Decision Making*, Paul M. Collins Jr. explores how organized interests influence the justices' decision making, including how the justices vote and whether they choose to author concurrences and dissents. Collins presents theories of judicial choice derived from disciplines as diverse as law, marketing, political science, and social psychology. This theoretically rich and empirically rigorous treatment of decision making on the nation's highest court, which represents the most comprehensive examination ever undertaken of the influence of U.S. Supreme Court amicus briefs, provides clear evidence that interest groups play a significant role in shaping the justices' choices. Law and Society Steven Vago, Steven E. Barkan, 2017-09-22 In the 11th edition of *Law and Society*, Steven E. Barkan preserves Dr. Vago's voice while making this classic text more accessible for today's students. Each chapter now includes an outline, learning objectives, key terms, and chapter summaries. A new epilogue chapter examines law and inequality in the United States as it moves into the third decade of this century. The 11th edition reflects new developments in law and society literature, as well as recent real-life events with legal relevance for the United States and other nations. *Law and Society* is for one semester undergraduate courses in Law and Society, Sociology of Law, Introduction to Law, and a variety of criminal justice courses offered in departments of Sociology, Criminal Justice, and Political Science. *The Test of Time* Rick Farmer, John David Rausch, John Clifford Green, 2003-01-01 *The Test of Time* moves beyond the realm of speculation and punditry to analyze the observable and measurable effects of the early experiences of state legislatures with term limits. Setting the agenda for future term limits studies, this volume brings together fifteen outstanding empirical studies contributed by top political scientists and state policymakers. Five of the essays (case studies of key states) offer depth and context for understanding the shifting institutional changes wrought by term limits at the state level. The remaining chapters develop these findings through cross-state

comparisons that examine how legislatures legislators and political linkages such as lobbying and electoral competition have been affected by the imposition of legislative term limits Supported by a comprehensive annotated bibliography of term limits literature and a history of the term limits movement this work will be an enduring resource for academics teaching courses in state government and practitioners either experiencing term limits or preparing for term limits to take effect **Knowledge in Action** Annemarie van Paassen,Jolanda van den Berg,Eveliëne Steingröver,Renate Werkman,Bas Pedroli,2011-10-05 Wageningen University and Research Centre is known for its practical and societally relevant research in spatial development Stakeholders currently put much emphasis on participatory processes in landscape planning procedures This poses a special challenge for research What role does research play in our present world characterised by complexity competing claims and development needs and an increased concern for climate change and environmental impact In the book **Knowledge in Action** we explore different types of transdisciplinary research that scientists engage in Depending on the societal context and the interests of local citizens researchers apply different research approaches to optimally incorporate the various points of view in their research and promote processes enhancing dialogue and shared results In the book authors present their research experiences their theoretical inspiration the research methodology applied to consult share and collaborate with societal actors in order to create options for change The book includes several striking examples from The Netherlands both successful and less effective and also innovative examples from communities in Africa and Asia The authors reflect on opportunities problems and dilemma s they had to deal with They especially address how far the role and theoretical perspectives of collaborative researchers can lead them in action research Can they limit themselves to joint knowledge production and learning processes or should they engage in strategic positioning advocacy and entrepreneurship to make it happen The book discusses the issues that researchers should consider when they position their research activities within ongoing developments at landscape level Read the book and judge for yourself **CliffsTestPrep Praxis II: Social Studies Content Knowledge Test (0081)** Shana Pate,2007-05-04 Your guide to a higher score on the Praxis II Social Studies Content Knowledge Test 0081 Why CliffsTestPrep Guides Go with the name you know and trustGet the information you need fast Written by test prep specialists About the contents Introduction Overview of the exam How to use this book Proven study strategies and test taking tips Tactics for answering multiple choice questions plus practice examples with answers and explanations Part I Subject Review Focused review of all exam topics world history United States history government political science civics geography economics and the behavioral science fields of sociology anthropology and psychology Part II 2 Full Length Practice Examinations Like the actual exam each practice exam includes 130 multiple choice questions with sections on each of the 6 categories Complete with answers and explanations for all questions Test Prep Essentials from the Experts at CliffsNotes *Civic Education* Richard G. Wing, 2012-12-06 Bernard R Gifford and Linda C Wing Standardized testing has become a ubiquitous feature of American life As a major source of information for reducing uncertainty in the allocation of merit based educational training and employment opportunities testing affects the life chances of individuals Moreover testing influences the way in which our society judges itself and provides for our collective future Test scores may determine a child s admission to kindergarten and promotion to the first grade Most states award the high school diploma only if a student has passed a minimum competency test Major institutions of higher education typically require applicants to supplement their records of academic achievement with scores on college admissions tests In the labor market as a condition of employment or assignment to training programs more and more employers are requiring workers to sit for personnel selection tests Additionally it has become commonplace to use test scores to calibrate our national sociopolitical condition and our capacity to compete with other countries in the global economy In short with increasing frequency and intensity scores on examinations that purport to be objective and precise measures of individual knowledge abilities and potential are playing a critical role in the opportunity marketplace Similarly test scores are exercising growing influence in assessments of our social and economic institutions and in policy decisions about the relative investments that should be made in each In all these instantiations test scores are at the center of high stakes decision making about the future of individuals and of the nation itself

Kill the Messenger Richard Phelps, 2017-09-04 In response to public demand federal legislation now requires testing of most students in the United States in reading and mathematics in grades three through eight Many educators parents and policymakers who have paid little attention to testing policy issues in the past need to have better information on the topic than has generally been available *Kill the Messenger* now in paperback fills this gap This is perhaps the most thorough and authoritative work in defense of educational testing ever written Phelps points out that much research conducted by education insiders on the topic is based on ideological preference or profound self interest It is not surprising that they arrive at emphatically anti testing conclusions Much if not most of this hostile research is passed on to the public by

journalists as if it were neutral objective and independent Kill the Messenger explains and refutes many of the common criticisms of testing describes testing opponents strategies through case studies of Texas and the SAT illustrates the profound media bias against testing acknowledges testing s limitations and suggests how it can be improved and finally outlines the consequences of losing the war on standardized testing **Congressional Record** United States.
