Dialectic of Sedimentation and Innovation Mabiala Justin-Robert Kenzo,2009 One of the most important developments in the episteme of our time is the recognition that all being and all knowing are socially conditioned This recognition raises the question of subjective creativity Is creativity or innovation possible What is the locus of creativity Is it the subject or the structure of the structures of being of which the subject is part Any notion of creativity that takes seriously the condition of being is therefore bound to deal with the perennial issue of freedom and determinism Dialectic of Sedimentation and Innovation examines the contribution of Paul Ricoeur to this question for the purpose of theological consumption Ricoeur s philosophical reconstruction of the subject as self creates a space midway between the modern self positing subject and the postmodern deconstructed subject where reason rules but does not tyrannize It is from this space that he proposes a view of humanity that argues that to be human is to be homo voluntas homo lingua and homo capax Dialectic of Sedimentation and Innovation seeks to theologically appropriate these notions for Africa s quest for a new creative identity Creative Rationality and Innovation Joelle Forest,2018-01-03 This book urges us to be creative in our

way of thinking about innovation Adopting an artificial perspective the author emphasizes creative rationality a form of thought that encourages knowledge crossing and invites an adventurous transgression The question of how such a form of thought might be developed is addressed through a detailed examination of the educational system The book frees itself from many of the myths that surround innovation including the predominance of what the author calls the linear and hierarchical model
