Behind Me Stephen Leacock,2013-04-18 Stephen Leacock is regarded as one of Canada s finest writers known for his wit and humour at one point becoming the best known humorist in the English speaking world This collection of articles was published posthumously by his niece Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive Hesperides Press are republishing these classic works in affordable high quality modern editions using the original text and artwork **Political Silence of Youth in Togo** Roos Keja,2022-02-07

This book paints an image of sociality in duress describing how new Information and Communication Technologies ICT bring possible changes in political engagement and civic ness The political branch of the field of ICT for Development ICT4D is firmly convinced that this translates in civic engagement and democratisation This book questions this conception by showing that mistrust greatly increases through new ICT in a society where mistrust has been internalised These processes are examined in the society encountered in Sokod the capital of the Central Region of Togo in the period between 2015 and 2020 when the mobile phone became widespread among young people This ethnographic research provides a snapshot of the changes brought about by new ICT in the social fabrics and the lives of these young people The place and period are highly relevant for getting a better understanding of the forms that civic engagement can take and the roles that new ICT can play in settings of political repression Togo has been ruled by the same family for over half a century and Sokod is one of the rare places of fierce political opposition However young people do not persevere in massive street protests like in other countries even though they appear to have every reason to do so How can the circumstances and social processes be understood that are leading to this political silence and how do frustration and anger find their way The link between new ICT and civic engagement has more often been made but mostly quantitative and volatile lacking empirical grounding This book demonstrates that there is indeed a connection between new ICT and social change Through their phones young people inform themselves in different ways and they react differently to social and political changes Their reflection on politics has also altered minimal as it may seem By closely regarding the context and mechanisms by which the trustworthiness of information is valued this book contributes to the nascent research field of communication and political anthropology
