The Nurture Loop Neil Helgeland, 2014-12-26 This monograph is published to achieve the critical focus that is necessary in efforts to restore the grand old institution of public education to the revered status it used to enjoy and which it so richly deserves because it is so basic to all our other societal institutions This monograph is a condensation and refinement of the author's frenzied efforts to assess the relationship between the mounting disarray in our social order and the mounting problems in public education While that relationship is very complex and the prevailing sentiment seems to be confused as to whether the fault lies in the schools or society as a whole the monograph makes a strong case that the schools can be the focal point for remediation regardless of where the blame lies **The Nurture Loop** Neil Helgeland, 2014-12-26

R.J.S. Macpherson, 2003-09-02 Responding to the international problem identified by the US National Commission on Excellence in Educational Administration that the field of educational leadership lacks a good definition, this book reports a collaboration process that produced a practical theory of educative leadership. In offering a holistic theory which deals with the abstract world of ideas and reflection, this volume shows how these ideas are translated into management practice and what happens or what is likely to happen in such a process. The theory integrates management and evaluation with the philosophical, strategic, political, and inspirational services that educative leaders give. It is aimed at lecturers in education, administration, management, headteachers, MEd lecturers, and students, leadership and management lecturers, and students.

The answer to this challenge is personalizing learning: a switch from the school to the learner, from the needs of the system to the needs of the person. This book presents both a manifesto and a model for the personalization of learning. It combines emerging theories of learning with best professional practice to support schools in developing their own way of moving from improvement to transformation. **Effective Learning and Teaching in Medical, Dental and Veterinary Education** Sharon Huttly, John Sweet, Ian Taylor, 2003-12-16 The Effective Learning and Teaching in Higher Education series will include over 20 volumes, each packed with up-to-date advice, guidance, and expert opinion on teaching in the key subjects in higher education today and backed up by the authority of the Institute for Learning and Teaching.
