A Question of Torture Alfred McCoy,2007-04-01 A startling expos of the CIA s development and spread of psychological torture from the Cold War to Abu

Ghraib and beyond In this revelatory account of the CIA's secret fifty year effort to develop new forms of torture historian Alfred W McCoy uncovers the deep disturbing roots of recent scandals at Abu Ghraib and Guantanamo Far from aberrations as the White House has claimed A Question of Torture shows that these abuses are the product of a long standing covert program of interrogation Developed at the cost of billions of dollars the CIA's method combined sensory deprivation and self inflicted pain to create a revolutionary psychological approach the first innovation in torture in centuries The simple techniques involving isolation hooding hours of standing extremes of hot and cold and manipulation of time constitute an all out assault on the victim's senses destroying the basis of personal identity McCoy follows the years of research which he reveals compromised universities and the U S Army and the method's dissemination from Vietnam through Iran to Central America He traces how after 9 11 torture became Washington's weapon of choice in both the CIA's global prisons and in torture friendly countries to which detainees are dispatched Finally McCoy argues that information extracted by coercion is worthless making a case for the legal approach favored by the FBI Scrupulously documented and grippingly told A Question of Torture is a devastating indictment of inhumane practices that have spread throughout the intelligence system damaging American's laws military and international standing

Science, Religion and Communism in Cold War Europe Paul Betts, Stephen A. Smith, 2016-05-14 Religion and science were fundamental aspects of Eastern European communist political culture from the very beginning and remained in uneasy tension across the region over the decades While both topics have long attracted a great deal of scholarly attention they almost invariably have been studied discretely as separate stories Religion Science and Communism in Cold War Europe is the first scholarly effort to explore the delicate interface of religion science and communism in Cold War Europe It brings together an international team of researchers who address this relationship from a number of national viewpoints and thematic perspectives ranging from mysticism to social science space exploration to the socialist lifecycle and architectural heritage to pop culture

Hinduism and Quantum Theory Bruno Del Medico, 2025-03-09 Comparing Eastern philosophies and quantum physics reveals fascinating similarities that invite us to reconsider our understanding of reality The intent of the book is to explore the surprising connection between the ancient philosophical traditions of Hinduism and the principles of quantum physics An initial part explains in a totally understandable way the basic principles of quantum physics and the philosophy related to this new science In the sequel an evocative journey leads the reader to discover how these two seemingly distant realities can interact and influence each other Hinduism with its profound metaphysical principles offers a framework that seems to anticipate in many respects the discoveries of quantum physics The book compares some of the major themes of Hinduism with their corresponding quantum notions Brahman represents ultimate reality an interconnected whole that permeates everything This aligns with the concept of quantum entanglement in which particles can remain connected regardless of the distance between them and suggests that separation at the fundamental level may just be an illusion One of the Upanishads reads All this is Brahman highlighting universal

interconnectedness and recalls the Higgs field which gives mass and wave nature to particles Atman the individual soul that is a manifestation of Brahman can be viewed through the lens of quantum superposition in which one particle exists in multiple states simultaneously This reflects the idea that the true essence of the self exists on multiple planes of reality The concept of Karma is based on the law of cause and effect parallel to Heisenberg's indeterminacy where the precision of one measure affects that of another Actions in the present can thus influence future outcomes in ways that are not always predictable Moksha liberation from the cycle of death and rebirth finds a parallel in quantum decoherence the process by which a quantum system loses its quantum properties This transition represents the transformation of consciousness from one state to another analogous to the quest for spiritual liberation Dharma or each person's ethical duty is reflected in correlations between particles where interactions influence the behavior of a complex system Any action taken in accordance with Dharma can have long term effects similarly quantum relationships shape our universe It should be pointed out that this book deals with Hindu philosophy not Hindu religion This distinction takes on particular relevance in the context of quantum physics While Hindu religion deals with devotion and the cosmic order established by deities Hindu philosophy offers a framework for understanding a complex interconnected and constantly changing reality For example the idea of Maya the illusory perception of the material world has parallels with the uncertainty principle in quantum physics according to which we cannot simultaneously know precisely the position and velocity of a particle Finally religion is a collective and ritual path while philosophy is a more individual and contemplative path Both enrich Hinduism but with different perspectives and goals In religion one seeks union with the divine In philosophy one seeks an understanding of being The two dimensions therefore coexist but offer different tools for exploring the same reality As Swami Vivekananda told the World Parliament of Religions in 1893 Hinduism is not a religion but an infinite wealth of human experience A phrase that perfectly sums up this richness and complexity *The British Medical Journal* ,1907 **The Facts on File Companion to the British Short Story** Andrew Maunder,2007 A comprehensive reference to short fiction from Great Britain Ireland and the British Commonwealth With approximately 450 entries this A to Z guide explores the literary contributions of such writers as Joseph Conrad James Joyce D H Lawrence Rudyard Kipling Oscar Wilde Katherine Mansfield Martin Amis and others *The Musician* ,1901 *Biblical Counsel* ,1993 **British Medical Journal** ,1907 *Yoga Journal* ,1996-05 For more than 30 years Yoga Journal has been helping readers achieve the balance and well being they seek in their everyday lives With every issue Yoga Journal strives to inform and empower readers to make lifestyle choices that are healthy for their bodies and minds We are dedicated to providing in depth thoughtful editorial on topics such as yoga food nutrition fitness wellness travel and fashion and beauty *The Christian Advocate* ,1926 **The Laser Disc Newsletter** ,1995
