The Notebooks of Leonardo Da Vinci Leonardo Da Vinci, 2002 The Notebooks of Leonardo Da Vinci Leonardo Da Vinci, 2019-12-20 This new Great collection of his art and notes from Cheapest Books Put together all notes and drawings of Da Vinci as found not need reordered A singular fatality has ruled the destiny of nearly all the MOST FAMOUS OF LEONARDO DA VINCI S WORKS Two of the three most important were never completed obstacles having arisen during his life time which obliged him to leave them unfinished namely the Sforza Monument and the Wall painting of the Battle of Anghiari while the third the picture of the Last Supper at Milan has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIth and XVIIth centuries Nevertheless no other picture of the Renaissance has become so wellknown and popular through copies of every description Vasari says and rightly in his Life of Leonardo that he laboured much more by his word than in fact or by deed and the biographer evidently had in his mind the numerous works in Manuscript which have been preserved to this day To us now it seems almost inexplicable that these valuable and interesting original texts should have remained so long unpublished and indeed forgotten It is certain that during the XVIth and XVIIth centuries their exceptional value was highly appreciated This is proved not merely by the prices which they commanded but also by the exceptional interest which has been attached to the change of ownership of merely a few pages of Manuscript Leonardos literary labours in various departments both of Art and of Science were those essentially of an enquirer hence the analytical method is that which he employs in arguing out his investigations and dissertations The vast structure of his scientific theories is consequently built up of numerous separate researches and it is much to be lamented that he should never have collated and arranged them His love for detailed research as it seems to me was the reason that in almost all the Manuscripts the different paragraphs appear to us to be in utter confusion on one and the same page observations on the most dissimilar subjects follow each other without any connection A page for instance will begin with some principles of astronomy or the motion of the earth then come the laws of sound and finally some precepts as to colour Another page will begin with his investigations on the structure of the intestines and end with philosophical remarks as to the relations of poetry to painting and so forth Leonardo himself lamented this confusion and for that reason I do not think that the publication of the texts in the order in which they occur in the originals would at all fulfil his intentions No reader could find his way through such a labyrinth Leonardo himself could not have done it Added to this more than half of the five thousand manuscript pages which now remain to us are written on loose leaves and at present arranged in a manner which has no justification beyond the fancy of the collector who first brought them together to make volumes of more or less extent Nay even in the volumes the pages of which were numbered by Leonardo himself their order so far as the connection of the texts was concerned was obviously a matter of indifference to him The only point he seems to have kept in view when first writing down his notes was that each observation should be complete to the end on the page on which it was begun

From Sight to Light A. Mark Smith, 2017-11-16 From its inception in Greek antiquity the science of optics was aimed primarily at explaining sight and accounting for why things look as they do By the end of the seventeenth

century however the analytic focus of optics had shifted to light its fundamental properties and such physical behaviors as reflection refraction and diffraction This dramatic shift which A Mark Smith characterizes as the Keplerian turn lies at the heart of this fascinating and pioneering study Breaking from previous scholarship that sees Johannes Kepler as the culmination of a long evolving optical tradition that traced back to Greek antiquity via the Muslim Middle Ages Smith presents Kepler instead as marking a rupture with this tradition arguing that his theory of retinal imaging which was published in 1604 was instrumental in prompting the turn from sight to light Kepler s new theory of sight Smith reveals thus takes on true historical significance by treating the eye as a mere light focusing device rather than an image producing instrument as traditionally understood Kepler s account of retinal imaging helped spur the shift in analytic focus that eventually led to modern optics A sweeping survey From Sight to Light is poised to become the standard reference for historians of optics as well as those interested more broadly in the history of science the history of art and cultural and intellectual history
