In Place of the Self Ron Dunselman, 2015-09-16 The Author sheds

important new light on addiction so that both individuals and professionals can make more informed choices Drawing on extensive research with drug users and his rehabilitation work as a psychologist Ron Dunselman offers remarkable insights into why drugs are so attractive to users the origin and history of drugs detailed descriptions of the physical and psychological effects of each drug how drugs undermine personal identity *Understanding the Whole Student* Clifford Mayes, Ramona Maile Cutri, Neil Goslin, Fidel Montero, 2016-03-03 *Understanding the Whole Student* presents a holistic approach to multicultural educational issues by viewing them in terms of the student as a physical psychosocial cognitive ethical and spiritual being Conversely these levels of a student's being cannot be seen apart from the student's cultural identities This unique book demonstrates that in a pluralistic democracy good teaching and deep learning must be multicultural and must look at the student as a whole being not just as a future worker in a transnational corporate economy as is currently the case with both neo liberal and neo conservative programs for reform The authors contend that good education is and must be multicultural in order to gain a deeper perspective on issues under analysis in the classroom through the sharing and negotiating of many different cultural perspectives Cincinnati Lancet and Clinic , 1890

Semantics and The Lexicon James Pustejovsky, 2012-12-06 The goal of this book is to integrate the research being carried out in the field of lexical semantics in linguistics with the work on knowledge representation and lexicon design in computational linguistics Rarely do these two camps meet and discuss the demands and concerns of each other's fields Therefore this book is interesting in that it provides a stimulating and unique discussion between the computational perspective of lexical meaning and the concerns of the linguist for the semantic description of lexical items in the context of syntactic descriptions This book grew out of the papers presented at a workshop held at Brandeis University in April 1988 funded by the American Association for Artificial Intelligence The entire workshop as well as the discussion periods accompanying each talk were recorded Once complete copies of each paper were available they were distributed to participants who were asked to provide written comments on the texts for review purposes VII JAMES PUSTEJOVSKY 1 INTRODUCTION There is currently a growing interest in the content of lexical entries from a theoretical perspective as well as a growing need to understand the organization of the lexicon from a computational view This volume attempts to define the directions that need to be taken in order to achieve the goal of a coherent theory of lexical organization **The Mahabharata: A Modern Retelling** Erin Bernstein, Kisari Mohan Ganguli, 2022-01-31 Please take a moment to enjoy this book a volume the original editors feel is an interpolation since the story pauses for a time to catch its breath The original editor thought the pale men of White Island were Romans Were they really that pasty Author The Moral Class Book, Or the Law of Morals; Derived from the Created Universe, and from Revealed Religion. Intended for Schools William SULLIVAN (of Boston.), 1833 **The Sixth Sense of the Avant-Garde** Irina Sirotkina, Roger Smith, 2017-04-20 The touch and movement senses have a large place in the modern arts This is widely discussed and celebrated often enough as if it represents a breakthrough in a primarily visual

age This book turns to history to show just how significant movement and the sense of movement were to pioneers of modernism at the turn of the 20th century It makes this history vivid through a picture of movement in the lives of an extraordinary generation of Russian artists writers theatre people and dancers bridging the last years of the tsars and the Revolution Readers will gain a new perspective on the relation between art and life in the period 1890 1920 in great innovators like the poets Mayakovsky and Andrei Bely the theatre director Meyerhold the dancer Isadora Duncan and the young men and women in Russia inspired by her lead and esoteric figures like Gurdjieff Movement and the turn to the body as a source of natural knowledge was at the centre of idealistic creativity and hopes for a new age for a new man and this was true both for those who looked forward to the technology of the future and those who looked back to the harmony of Ancient Greece The book weaves history and analysis into a colourful thoughtful affirmation of movement in the expressive life
