The Papacy In The Modern World A Political History:

The Papacy in the Modern World Frank J. Coppa, 2014-06-15 In March 2013 millions of people sat glued to news channels and live Internet feeds waiting to see white smoke rise from the Sistine Chapel signaling the election of the new pope. For two millennia the papacy, leader of the Roman Catholic Church, has played a fundamentally important role in European history and world affairs. Transcending the religious realm, it has influenced ideological, philosophical, social, and political developments as well as international relations. Considering the broad role of the papacy from the end of the eighteenth century to the present, this original history explores the reactions and responses it has evoked and its confrontation with and accommodation of the modern world. Frank J. Coppa describes the triumphs, controversies, and failures of the popes over the past two hundred years, including Pius IX who was criticized for his campaign against Italian unification and his proclamation of papal infallibility; Pius XII denounced for his silence during the Holocaust and impartiality during World War II; and John XXIII who was praised for his call to update the Church and for convoking the Second Vatican Council. Examining a wide variety of sources, some only recently made available by the Vatican archives, *The Papacy in the Modern World* sheds new light on this institution and offers valuable insights into events previously shrouded in mystery. **Politics**

and the Papacy in the Modern World Frank J. Coppa, 2008-06-30 Here Coppa focuses on Rome's response to the modern world, exploring the papacy's political and diplomatic roles during the past two centuries. He examines the Vatican's impact upon major ideological developments over the years, including capitalism, nationalism, socialism, communism, modernism, racism, and anti-Semitism. At the same time, he traces the continuity and change in the papacy's attitude towards church-state relations and the relationship between religion and science. **BOOK JACKET The Papacy Confronts the Modern World**

Frank J. Coppa, 2003 Coppa's *St. John's U* focuses on the relationship of the papacy to the major forces and ideologies spawned by the revolutionary age, from the French to the Spanish. He details how the head of the Roman Catholic Church reacted to modernization, materialism, the changed economic climate, and problems arising from new techniques of production. 8 The Holy See and Palestine Conclusion Bibliography Index *The Limits of Empire: European Imperial Formations in Early Modern World History* William Reger, 2016-03-03 This volume, published in honor of historian Geoffrey Parker, explores the working of European empires in a global perspective, focusing on one of the most important themes of Parker's work: the limits of empire, which is to say the centrifugal forces—sacral, dynastic, military, diplomatic, geographical, informational—that plagued imperial formations in the early modern period, 1500–1800. During this time of wrenching technological, demographic, climatic, and economic change, empires had to struggle with new religious movements, incipient nationalisms, new sea routes, new military technologies, and an evolving state system with complex new rules of diplomacy. Engaging with a host of current debates, the chapters in this book break away from conventional historical

conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we re proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

Volume IV Carmen M. Mangion, Susan O'Brien, 2023-09-01 After 1830 Catholicism in Britain and Ireland was practised and experienced within an increasingly secure Church that was able to build a national presence and public identity With the passage of the Catholic Relief Act Catholic Emancipation in 1829 came civil rights for the United Kingdom's Catholics which in turn gave Catholic organisations the opportunity to carve out a place in civil society within Britain and its empire This Catholic revival saw both a strengthening of central authority structures in Rome creating a more unified transnational spiritual empire with the person of the Pope as its centre and a reinvigoration at the local and popular level through intensified sacramental devotional and communal practices After the 1840s Catholics in Britain and Ireland not only had much in common as a consequence of the Church's global drive for renewal but the development of a shared Catholic culture across the two islands was deepened by the large scale migration from Ireland to many parts of Britain following the Great Famine of 1845 Yet at the same time as this push towards a degree of unity and uniformity occurred there were forces which powerfully differentiated Catholicism on either side of the Irish Sea Four very different religious configurations of religious majorities and minorities had evolved since the sixteenth century Reformation in England Ireland Scotland and Wales Each had its own dynamic of faith and national identity and Catholicism had played a vital role in all of them either as other or in the case of Ireland as the majority's self Identities of religion nation and empire and the intersection between them lie at the heart of this volume They are unpacked in detail in thematic chapters which explore the shared Catholic identity that was built between 1830 and 1913 and the ways in which that identity was differentiated by social class gender and above all nation Taken together these chapters show how Catholicism was integral to the history of the United Kingdom in this period
