Hewlett Packard since 1986 and formalized in the HP methodology for IT Strategy and Architecture ITSA The important message is that architecture is used to solve problems or exploit opportunities and is not used for the sake of architecture Core to this is the concept of a seamless chain of justification that unites stakeholders in defining reinforcing and supporting the single best fitting IT business solution This book teaches the IT architecture practitioner how to align the different views and interests of these stakeholders into coherent IT architecture artifacts by permeating the business functional technical and implementation perspectives

Creating Business Value with Information Technology: Challenges and Solutions Shin, Namchul, 2002-07-01 Questions on the business value of information technology IT which have been raised by managers and researchers for the last decade are not settled yet Firms invest in IT to improve their business performance However some firms fail to improve their business performance while others succeed The overall value of IT varies enormously from firm to firm Computerization does not automatically create business value but it is one essential component that should be coupled with organizational changes such as new strategies new business processes and new organizational structure Creating Business Value with Information Technology Challenges and Solutions aims to solicit the studies that yield significant new insights into the business value of IT
