For Instructors

An added feature to the eighth edition of *Physics Laboratory Experiments* is a set of pre-lab demonstrations. The purpose of these demonstrations is to “break the ice,” so to speak. Students often come to the laboratory unenthusiastic. If something attention-getting (a demo) is presented initially that is related to the lab experiment, or some other physics principle that has been studied in class, interest is aroused. This being done, the instructor can lead into the current lab experiment.

A list of the demonstrations follows. They are instructive and economical, usually done with available materials and items. In some demonstrations, students can participate, adding to the attention-getting. Enjoy.

- **Skewed Balloon** (And it doesn't burst!)
- **Problem in Data Analysis** (There's a dollar missing)
- **Mixed Liquids Become More Dense**
- **Problem in Math Analysis** (Can $2 = 1$?)
- **Apparent Weightlessness** (Where's the water?)
- **Different Distances of Fall** (Listen to the sound)
- **Problem in Kinematics**
- **Which Way Does the Bubble Go?** (Mass and inertia)
- **Newton's Cradle** (In-and-out)
- **Pendulum and Peg**
- **Bucket Swing** (What keeps the water in the pail?)
