

CHAPTER 7

Segment and Interim Reporting

SOLUTIONS TO PROBLEMS

P7-1

JCN Company is a public company. Therefore, it would be required to comply with segmented reporting as outlined in IFRS 8. The laptop computers and software areas of business would both be over the 10% guideline for revenue and would therefore be reported as operating segments. For geographic segments, if revenues are material, there should be a separate segment. If we assume that 10% is material then United States, Canada, South America and Africa would be disclosed separately unless the operating segments above already provide that information. Before making a decision, materiality would need to be determined. It should also be considered whether any of the geographical areas should be grouped together.

P7-2

a) The most important indicator to identify business segments is whether the operation is managed as a separate segment. Given that this problem is silent on how the divisions are being managed, the relative independence of the operations may provide an indication of the appropriate treatment. It would appear that Auto Corporation should report Divisions A and C as one operating segment and Divisions B and D as a second operating segment. Divisions A and C share production facilities. Therefore they are not really separable as individual segments. Most costs and assets are allocated to A and C, rather than being directly assignable. Division B is a producer of input to Division D. The profits of B are highly sensitive to the transfer price. There is likely to be little autonomy for B.

b)

	Segment 1	Segment 2	Eliminate	Reconciled to Consolidated
External sales	\$275,000	\$105,000		\$380,000
Inter-segment sales	—	60,000	(60,000)	—
	275,000	165,000		380,000
Assignable operating expenses	155,000	85,000	(60,000)	180,000
Depreciation expense	35,000	37,500		72,500
	190,000	122,500		252,500
Segment operating profit (loss)	\$ 85,000	\$ 42,500		\$127,500
Unallocated corporate expenses				59,500
Entity profit before income taxes				\$ 68,000
