Solution Principles Of Taxation Law:

Simple Solutions to Complex Catastrophes John Braithwaite, 2024-02-26 This open access book sets out simple solutions to managing complex catastrophes. It focusses on four kinds of crises: climate change, crime, war, cascades, epidemics, and financial crises. These catastrophes are conceived as complex and prone to cascade effects. This book is optimistic in explaining that there are identifiable simple institutions that international society can strengthen and some simple principles that can help humankind to control the expanding gamut of complex catastrophes that confront the planet, including simple stable institutions and regulatory bodies. It draws on a wide range of current and past crises and challenges from the Cold War to COVID 19 and from Weapons of Mass Destruction to restorative diplomacy with States like China to provide an urgent and timely path forward. Braithwaite argues that improved peacemaking and step by step progress toward abolition of Weapons of Mass Destruction helps prevent environmental, pandemic, and financial catastrophes. His method across four kinds of crises is first to prioritize simple principles and simple institutions that prevent coupled catastrophes from cascading one to the other. The next step is to pursue requisite variety in responses by diagnosing dialectically when additional interventions will and will not add value for crisis control. Braithwaite argues that minimal sufficiency of deterrence, responsive regulation of risks, and restorative diplomacy offer superior theoretical foundations than realism in international relations theory and in organizational crime control. It speaks to those interested in criminology, public policy, and international relations, political science, sociology, public health, and economics.

of Tax Treaties Carlo Garbarino, 2016-10-28 Judicial Interpretation of Tax Treaties is a detailed analytical guide to the interpretation of tax treaties at the national level. The book focuses on how domestic courts interpret and apply the OECD Commentary to OECD Model Tax Convention on Income and on Capital. Adopting a global perspective, the book gives a systematic presentation of the main interpretive proposals put forward by the OECD Commentary and analyses selected cases decided in domestic tax systems in order to assess whether and how such solutions are adopted through national judicial process and indeed which of these are of most practical value. The book operates on two levels: firstly it sets out a clear and comprehensive framework of tax treaty law which will be an important tool for any tax practitioner. Secondly, the book provides crucial guidance on issues of tax treaty law as applied at domestic level such as investment or business income dispute resolution and administrative cooperation.
